Levels of protection definitions

Buffer: When a segment matures, if the index rate of return is negative and exceeds the buffer, the buffer will reduce your losses. You will only incur the portion of the loss that exceeds the buffer. For example, if the buffer is -10% and the index rate of return is -15% at maturity, you will incur a -5% loss. If the index rate of return is a loss that **does not exceed the buffer**, then:

- **For contingent yield indexed accounts with a buffer**, you will earn the contingent yield. For example if the buffer is -10%, the contingent yield is 6%, and the index rate of return is -5% at maturity, your rate of return will be 6%.
- **For all other indexed accounts with buffer**, you will not incur a loss. For example, if the buffer is -10% and the index rate of return is -5% at maturity, your rate of return will be 0%.

Additionally, for Annual Fee indexed accounts, the fee will reduce the rate of return after the buffer is applied.

Floor: When a segment matures, if the index rate of return is negative, a floor can help limit your losses. You will only incur index losses up to the floor percentage. For example, if the floor is -10%:

- If the index rate of return is -5% at maturity, you will incur a loss of -5%.
- If the index rate of return is -15% at maturity, you will incur a -10% loss.

Trigger: When a segment matures, if the index rate of return is a loss that **exceeds** the trigger, this option will provide no protection and you will incur the full loss. If the index rate of return is positive, or is a loss that does not exceed the trigger, you will earn the contingent yield, a predetermined rate of return. For example, if the Contingent Yield is 6% and the Trigger is -25%:

- If the index rate of return is -25% at maturity, your rate of return will be 6%.
- If the index rate of return is -35%, you will incur a -35% loss.

About rates and contract issue dates

You will receive the applicable rates and annual fees in effect on the application date, provided the contract is issued within 30 days of the application date (plus the number of days until the next business day). Otherwise, you will receive the applicable rates and annual fees in effect on the date the contract is issued.

Money received before the contract is issued will earn daily fixed interest until the contract is issued. Contracts are generally issued on the next business day after all payments listed on the application have been received. However, if there are multiple purchase payments, we will not wait longer than 30 days (plus the number of days until the next business day) if we have received the minimum payment by then. Any remaining expected purchase payments listed on the application that are received after the contract is issued would go into the interim account until the next contract anniversary.

Additional purchase payments are allowed for 90 days after the date the contract is issued. Any purchase payments received after issue will go into the interim account until the next contract anniversary. (This includes expected purchase payments listed on the application that are received after the date the contract is issued.)

The caps shown for Annual Lock are annual caps. All other caps shown apply for the entire duration of the segment. The No Cap with Annual Fee indexed accounts have no cap at contract issue. We reserve the right to add a cap in the future.

The minimum purchase payment is \$10,000. The maximum purchase payment for ages up to age 75 is \$3,000,000 and for ages 76-90 is \$1,000,000 (based on the your age when the payment is received). These limits apply to the total purchase payments for all RiverSource annuities owned by the same individual. Purchase payments exceeding these limits require prior approval. RiverSource reserves the right to limit certain annuity features (for example, investment options) if prior approval is required.

Renewal rates and annual fees are set by RiverSource Life at our discretion and will be mailed to you 14 days before your annuity contract anniversary. The initial fixed account and interim account rates are guaranteed for one year from contract date and renew annually.

The Guaranteed Minimum Interest Rate (GMIR) for the fixed account and interim account is 3.00%. The guaranteed Minimum Contingent Yield for all 1-year indexed accounts is 1%. The Minimum Cap for Annual Lock indexed accounts and for all 1-year indexed accounts is 2%, for all 2-year indexed accounts is 4%, for all 3-year indexed accounts is 6%, and for all 6-year indexed accounts is 8%. The Maximum Annual Fee for all No Cap with Annual Fee indexed accounts is 8% (For PA, 1-year indexed accounts have a Maximum Annual Fee of 5% and 3-year indexed accounts have a Maximum Annual Fee of 2.5%.) The Minimum Upside Participation Rate for all indexed accounts is 100%.

Indexed accounts may be discontinued. When segments mature, any money in discontinued indexed accounts would need to be reallocated to a different indexed account or the fixed account.
