Federal Withholding

- If you are under 59 ½ and your withdrawal includes taxable income, an IRS early withdrawal penalty may apply.
- 10% federal tax will be withheld from the conversion amount unless you make a different withholding election below.

Important IRS Federal Withholding changes

- Effective January 1, 2023, regulations require use of a Form W-4R, signed by the taxpayer or authorized signer, to choose a federal withholding standing election at a rate other than the default rate of 10%.
- If 10% withholding is not preferred, you may request 0% federal withholding without a Form W-4R by indicating your choice below.

For federal withholding rates other than 0% or the 10% default federal rate:

- The account's taxpayer may establish a federal withholding percentage using the W-4R Federal Withholding Instruction for RiverSource form (Form 117574). This form may be obtained at: riversource.com/forms.
- **Do not attach a Form W-4R form to this distribution request.** The Form W-4R must be on file with RiverSource before it can be used during a distribution.
- Current federal standing elections can be confirmed by contacting us.

Federal Tax Withholding

- Withhold 0% federal tax
- Withhold 10% federal tax (If you check this box but already have a Form W-4R on file at RiverSource, the percent on your current Form W-4R will be used for processing the distribution.)
- Withhold at the rate on the Form W-4R already on file with RiverSource (If this box is checked and no Form W-4R is on file for this percentage, RiverSource must withhold the 10% default federal tax.)

NOTE: If you would like to withhold at a different rate than what is already on file with RiverSource, you must submit a new Form W-4R prior to submitting this distribution; do not attach a Form W-4R to this distribution request.

State Withholding

- If you don't indicate an election, we'll generally follow your choice for federal election unless your state does not allow.
 - No state tax withholding will be taken for states where withholding is not available.
 - The taxpayer's resident state on file is the state we use for state tax withholding.

- The actuarial present value of additional death and/or living benefits are considered, if applicable, in determining the fair market value (FMV) of annuity Roth IRA conversions within the same contract. The FMV is the contract value plus the present value of the additional benefits and is determined as of the date of the conversion. This is the amount that is reported on IRS Form 1099-R.
- If you've reached your required beginning date, you must take your Required Minimum Distribution (RMD) from your IRA before converting it to a Roth IRA.
- For fixed index annuities only: Any money withdrawn from a segment before its maturity date will not receive interest (including conversions).
- Partial conversions resulting in funds being moved out of a contract with a living benefit rider may impact the benefits provided by the rider. It is important to understand the terms of the living benefit rider with regard to surrenders.
- If you have an annuity with a guaranteed withdrawal benefit rider and the partial conversion amount is higher than the maximum guaranteed amount, it is considered an "excess withdrawal." An excess withdrawal could permanently decrease your guaranteed income and benefit values. If you do not contact us prior to submitting this form and the amount you have requested will result in an excess withdrawal, we will require that you complete the "Benefit Impact Acknowledgment Form" before processing can occur.
