

RiverSource® indexed universal life insurance

The charts below have information used to determine the rate credited on the average balance in a segment when a segment matures. The rate credited is based on the index return, after applying the applicable cap and floor rates. The credited rates are given in the “Indexed Interest Rate” columns. Cap and floor rates for each segment are also listed. If a segment has not yet matured, the ending index values and segment returns are shown as “N/A.”
