Market Review

U.S. Equities

Representing the U.S. equity market, the S&P 500[®] Index returned 28.71% during the 12 months ended December 31, 2021 (the “Reporting Period”). The U.S. equity market rose in each of the four quarters of 2021, closing near its all-time high and posting its third consecutive year of double-digit gains.

In the first quarter of 2021, rising bond yields and a value-led equity market dominated. The two key drivers of this performance were the Democrat victory in Georgia in January, paving the way for massive additional U.S. fiscal stimulus and progress in the COVID-19 vaccine rollout. An increase in the 10-year U.S. Treasury yield benefited financials and value stocks. The accelerating rollout of COVID-19 vaccines boosted investors’ hopes of a sustainable reopening of the economy. Small-cap stocks, which tend to be more cyclical and domestically focused, performed particularly well. The passage of President Biden’s stimulus package led to upgrades in consensus forecasts for U.S. Gross Domestic Product (“GDP”) growth for the year. Some investors worried the size of the U.S. stimulus could provoke a pickup in inflation. However, despite upgrading its growth forecasts for the year and expecting unemployment to decline, the U.S. Federal Reserve (the “Fed”) did not believe inflation would be meaningfully above target and did not expect to raise interest rates before 2024.

Discussions throughout the second quarter of 2021 centered on the central bank liquidity tailwind, fiscal stimulus, COVID-19 vaccine progress, reopening momentum, strong corporate profits and robust equity inflows. While inflation concerns were fairly pervasive, the Fed remained consistent in its messaging around expectations that price pressures would be transitory. The peak inflation theme gained traction as the quarter progressed, even as economists suggested the transitory period may be longer than expected. Corporate earnings season brought a round of outsized beats over consensus estimates, along with corporate commentary highlighting some input pressure offset for companies with above-average pricing power or productivity initiatives. Despite a late-quarter agreement between the White House and a bipartisan group of Senators on the framework of a physical infrastructure package, the path to additional fiscal stimulus remained complicated.

The U.S. equity market increased only marginally in the third quarter of 2021, as measured by the S&P 500[®] Index. Other major U.S. equity indices posted negative returns for the quarter. In July and August, the second quarter’s rally continued, as the focus remained on easy financial conditions, accommodative monetary policy, pent-up consumer demand, positive earnings sentiment, resilient operating margins, corporate buybacks and retail inflows. Some economic indicators, including higher inflation and lower than consensus expected retail sales and manufacturing activity, were causes of concern among investors, through the market and the Fed remained largely optimistic. Sentiment deteriorated in September as the spread of the COVID-19 Delta variant dampened reopening momentum and the Fed signaled for a slowdown of asset purchases. A still complicated path to fiscal stimulus in the House of Representatives, the then-looming debt ceiling discussion, and global risk events, including supply-chain disruptions and input price pressures, all put a strain on the U.S. equity market. September also saw a global risk asset sell-off on the heels of Chinese real estate developers’ leverage concerns and a spike in energy prices. U.S. Treasury yields climbed, as the global bond market posted its weakest month since March 2020.

The U.S. equity market, as measured by the S&P 500[®] Index, then rose strongly, logging its best performing quarter in the fourth quarter of 2021 since the fourth quarter of 2020 on the heels of robust consumer spending, strong corporate earnings results and passage of the U.S. government’s infrastructure plan. There remained a few areas of concern still intact, including the Omicron variant of COVID-19, which emerged in late November, persistent inflation and supply-chain pressures, acceleration in the Fed’s asset purchase tapering, and the fate of the social spending bill in Congress. Strong corporate earnings in October propelled U.S. equities higher despite the overhanging supply-chain issues and persistently high inflation. More than 80% of the S&P 500[®] Index constituent companies reported upside surprises. The positive momentum continued into November, and the passage of the infrastructure bill boosted market sentiment until the World Health Organization announced Omicron as a variant of concern given its potentially heightened transmissibility. Increased case counts around the world and travel restrictions added pressure to the equities markets globally. Moreover, the fate of the social spending bill was punted into 2022. However, in December, studies showed the Omicron variant tends to cause less severe symptoms. The Fed also announced an accelerated timeline for tapering its asset purchases, doubling its pace from a decrease of \$15 billion a month in corporate debt purchases to a decrease of \$30 billion a

month. The U.S. equity market rallied in December on positive seasonality and improved sentiment, closing the year on a high note. On the economic data front, inflation remained high in the fourth quarter, though the “peak inflation” narrative gained traction with cooler consumer confidence and manufacturing readings.

For the Reporting Period overall, all 11 sectors in the S&P 500® Index posted double-digit positive absolute returns. Energy, real estate and financials were the best performing sectors in the S&P 500® Index, as measured by total return, while the weakest performing sectors in the S&P 500® Index during the Reporting Period were utilities, consumer staples and industrials.

Within the U.S. equity market, all capitalization segments posted positive returns, led by large-cap stocks, as measured by the Russell 1000® Index, followed by mid-cap stocks, as measured by the Russell Midcap® Index, and then small-cap stocks, as measured by the Russell 2000® Index. From a style perspective, growth-oriented stocks modestly outperformed value stocks in the large-cap segment of the U.S. equity market during the Reporting Period, but value stocks significantly outperformed growth stocks in the mid- and small-cap segments during the same time frame. (All as measured by the FTSE Russell indices.)

International Equities

International equities rallied, but underperformed the U.S. equity market, during the Reporting Period. The MSCI Europe, Australasia, Far East (EAFE) Index (Net, USD, Unhedged) (the “MSCI EAFE Index”) posted a return of 11.26%.*

International equity markets overcame bouts of volatility during the first quarter of 2021 to surge to new highs during March, driven by two key themes — the accelerating rollout of the COVID-19 vaccines globally and the ongoing commitment from central banks around the world to support the economic recovery. Accelerating GDP growth, normalizing inflation and steepening yield curves laid the foundation for the “reflation trade,” as investors started to price in a brighter future. (Reflation is the inflation that typically comes immediately after a low-point in the economic cycle — often after economic stimulus, and the reflation trade is the purchase of specific stocks or sectors believed to outperform in that type of environment.) Markets took a sharp turn away from momentum stocks and favored cyclical sectors, many of which tend to be more value oriented. European equities were less impacted by inflation fears, as reopening progress pushed travel and leisure stocks higher, and U.K. equities were additionally buoyed by gains in energy prices. Markets welcomed the European Central Bank’s (“ECB”) decision to increase the pace of its Pandemic Emergency Purchase Programme (“PEPP”) asset purchases in response to the bond sell-off there. Markets also overcame pressure as AstraZeneca vaccine safety concerns and new local lockdown measures in France dampened near-term recovery prospects. March’s Euro-area Manufacturing Purchasing Managers Index posted a historical high. Japanese equities rose during the quarter, rallying on the back of a sharp rotation from growth to value stocks. Investor sentiment was also supported by the consistent weakness of the yen against the U.S. dollar and the rally in U.S. equities.

The rotation from growth to value stocks took a breather in April 2021, with growth stocks outperforming their value counterparts. Starting in May 2021, equity markets across the world were impacted by rising commodity prices, which stoked fears of earlier than consensus expected interest rate hikes from central banks, particularly the U.S. Fed. In June, international equities rallied following a weaker than consensus expected U.S. payrolls report that eased concerns of a shift to tighter monetary policy. Overall, discussions during the quarter centered on central bank liquidity tailwinds, fiscal stimulus, COVID-19 vaccine progress, economic reopening momentum, strong corporate profits and robust equity inflows. While inflation concerns were fairly pervasive, the Fed remained consistent in its messaging around expectations that price pressures would be transitory. European equities advanced for the fifth straight quarter amid a sharp rebound in economic growth, an accelerating COVID-19 vaccine rollout and significantly better than consensus expected first quarter 2021 corporate earnings. Cyclical stocks generated the best returns, although sector performance was broadly positive. The ECB maintained its accommodative monetary policy stance, while also upgrading its GDP growth forecast and raising its inflation forecast for both 2021 and 2022. In the U.K., the Bank of England (“BOE”) raised its economic growth forecast for 2021 and tapered its pace of asset purchases. In Japan, state of emergency measures following a third wave of COVID-19 cases that had begun in March 2021 and slowing COVID-19 vaccine rollouts weighed on investor sentiment for the majority of the second calendar quarter. However, the Japanese equity market rallied strongly during the first half of June, likely driven by the increased pace of inoculations. This exuberance was short-lived, however, as the direction of the Japanese equity market again turned sharply down in the middle of June in step with the U.S. equity markets.

* All index returns are expressed in U.S. dollar terms.

International equities fell during the third quarter of 2021 for the first time in six quarters. During the first half of the quarter, the international equity markets delivered strong returns, continuing the trend from the second calendar quarter along with an additional focus on positive corporate earnings as well as accommodative monetary policies. Pandemic-related pressures appeared to be easing, and economic activity appeared to be increasing. However, the markets receded in the second half of the third calendar quarter, primarily due to the Fed's announcements around tapering of monthly asset purchase plans but also due to heightened worries around an increase in interest rates, global supply-chain concerns, COVID-19 Delta variant cases and China's government regulations on Chinese technology stocks. Then, a debt crisis at one of China's largest property developers destabilized markets. All that said, European equities advanced for the sixth straight quarter, as risk sentiment was bolstered by robust corporate earnings, solid economic growth and an accommodative policy environment. The ECB signaled it would maintain interest rates at record lows for a longer period to support the economic recovery and unveiled a new flexible inflation policy framework. In the U.K., the BOE left monetary policy unchanged but signaled it was moving closer to raising its interest rates. Japanese equities also advanced during the quarter, rebounding largely on the Tokyo Olympics that began in July 2021 and on the election of Fumio Kishida to be the nation's next prime minister. Kishida was widely expected to compile a sizable fiscal package to shore up the Japanese economy. Bringing the MSCI EAFE Index into negative territory for the quarter were the equity markets of Germany and the Pacific Basin ex-Japan, which declined.

Many of the concerns that dominated the international equity markets in September 2021 ebbed somewhat in October, and the MSCI EAFE Index returned to positive territory, supported in Europe and the U.K. particularly by favorable third calendar quarter corporate earnings reports. The Japanese equity market declined in October as investors digested the prospects of new prime minister Kishida ahead of the general election that took place on October 31. Global news flow was generally negative in the first half of October, especially from China, but the sustained strength of U.S. equity markets provided some support for Japan. Equity markets in the Pacific Basin ex-Japan rose, rallying on both positive corporate earnings guidance and an ongoing decline in the number of new COVID-19 cases in many countries in the region. However, shares were weaker toward the end of the month with ongoing concerns around rising energy prices, higher inflation and ongoing tensions between the U.S. and China weighing on investment sentiment.

International equities then gave back its returns after a strong October, with the MSCI EAFE Index delivering a negative return in November 2021. The markets suffered over fears of the new Omicron variant of COVID-19 weighing on sentiment, led by Europe, which saw rising COVID-19 hospitalizations and varied restrictions. The emergence of the potentially more transmissible Omicron variant triggered a sell-off among global risk assets on the day after the U.S.' Thanksgiving, as investors fled to safety. Travel restrictions were re-imposed to curtail the spread of the new variant, while lockdown measures in Europe amid rising cases and deaths sought to have the same effect. Persistently high inflation weighed on market sentiment as well. Japan's equities underperformed the MSCI EAFE Index due both to inflation and supply-chain issues as well as to concerns round the spread of the new COVID-19 variant—the same narrative that affected their global counterparts. Following the sell-off in November, international equities saw a strong rebound in December 2021, as the initial scare of the Omicron variant dissipated. Studies of the variant showed that while it may be more contagious than other variants, it was likely not as severe as initially feared, with a smaller share of infections resulting in hospitalizations. This led to an improvement in investor sentiment, as widespread major restrictions became less likely. Value stocks outperformed growth stocks in December, which benefited international equities, due to their relatively high value/cyclical exposures.

For the Reporting Period overall, 10 of the 11 sectors of the MSCI EAFE gained, with energy leading the way, followed by information technology and financials. Communication services was the weakest performer on the basis of total return during the Reporting Period, followed by utilities and real estate.

From a country perspective, Austria was by far the strongest individual country constituent in the MSCI EAFE Index on a relative basis during the Reporting Period, followed by the Netherlands, Sweden, Norway and France. New Zealand and Hong Kong most significantly lagged the MSCI EAFE Index on a relative basis during the Reporting Period, each generating a negative total return. Portugal, Spain and Japan each posted a positive total return but also significantly underperformed the MSCI EAFE Index during the Reporting Period.

INVESTMENT OBJECTIVE

The Fund seeks to achieve investment results that correspond to the aggregate price and yield performance of a benchmark index that measures the investment returns of large capitalization stocks.

Portfolio Management Discussion and Analysis

Below, SSgA Funds Management, Inc. ("SSgA"), the Fund's Subadvisor, discusses the Goldman Sachs Variable Insurance Trust — Goldman Sachs Equity Index Fund's (the "Fund") performance and positioning for the 12-month period ended December 31, 2021 (the "Reporting Period").

How did the Fund perform during the Reporting Period?

During the Reporting Period, the Fund's Service Shares generated an average annual total return of 28.20%. This compares to the 28.71% average annual total return of the Fund's benchmark, the Standard & Poor's 500[®] Index (with dividends reinvested) (the "S&P 500[®] Index"), during the same time period.

During the Reporting Period, which sectors and which industries in the S&P 500[®] Index were the strongest contributors to the Fund's performance?

All 11 sectors in the S&P 500[®] Index generated double-digit gains during the Reporting Period. In terms of total return, the sectors that made the strongest positive contributions to the S&P 500[®] Index and to the Fund were energy, real estate and financials. The largest sector by weighting in the S&P 500[®] Index at the end of the Reporting Period was information technology at a weighting of 29.17%. The industries with the strongest performance in terms of total return were real estate management and development; construction and engineering; oil, gas and consumable fuels; automobiles; and distributors.

On the basis of impact (which takes both total returns and weightings into account), the strongest performing sectors were information technology, financials and health care. The strongest performing industries on the basis of impact were software; interactive media and services; semiconductors and semiconductor equipment; technology hardware storage and peripherals; and banks.

Which sectors and industries in the S&P 500[®] Index were the weakest contributors to the Fund's performance?

In terms of total return, during the Reporting Period, the weakest performing sectors were utilities, consumer staples and industrials. The industries with the weakest performance in terms of total return were wireless telecommunication services; diversified telecommunication services; entertainment; airlines; and media.

On the basis of impact, the sectors that made the weakest contributions to the S&P 500[®] Index and to the Fund were utilities, materials and consumer staples. The industries with the weakest performance on the basis of impact were entertainment; diversified telecommunication services; wireless telecommunication services; leisure products; and gas utilities.

Which individual stocks were the top detractors, and which were the greatest positive contributors?

On the basis of impact, the stocks that made the strongest contribution during the Reporting Period were Alphabet Inc. Class A, Alphabet Inc. Class B, Apple, Microsoft and NVIDIA. The weakest performers were Walt Disney Company, Verizon Communications, PayPal Holdings, Moderna and Global Payments.

How did the Fund use derivatives and similar instruments during the Reporting Period?

During the Reporting Period, the Fund did not use derivatives as part of an active management strategy to add value to the Fund's results. However, equity index futures were used to equitize the Fund's cash holdings. In other words, we put the Fund's cash holdings to work by using them as collateral for the purchase of equity index futures. We also used these equity index futures to provide liquidity for daily cash flow requirements. Equity index futures had a neutral impact on the Fund's performance during the Reporting Period.

Were there any changes to the Fund's portfolio management team during the Reporting Period?

Effective November 2, 2021, Daniel TenPas no longer served as a co-portfolio manager for the Fund, and Michael Finocchi, Principal and Portfolio Manager, became a co-portfolio manager for the Fund. Mr. Finocchi joined Michael Feehily, Senior Managing Director and Senior Portfolio Manager of SSgA, and Melissa Kapitulik, Vice President and Senior Portfolio Manager of

SSgA, both of whom have managed the Fund since 2014. By design, all investment decisions for the Fund are performed within a co-lead or team structure.

What changes were made to the makeup of the S&P 500® Index during the Reporting Period?

Twenty-six stocks were removed from the S&P 500® Index during the Reporting Period. Among them were Alexion Pharmaceuticals, Hanesbrands, Kansas City Southern, L Brands, Tiffany, Western Union and Xerox Holdings. There were 26 stocks added to the S&P 500® Index during the Reporting Period, including Bath & Body Works, Caesars Entertainment, FactSet Research Systems, Moderna, Signature Bank, Solar Edge Technologies and NXP Semiconductors.

FUND VS. BENCHMARK SECTOR ALLOCATIONS²

As of December 31, 2021

² The Fund is actively managed and, as such, its composition may differ over time. Consequently, the Fund’s overall sector allocations may differ from percentages contained in the graph above. The graph categorizes investments using Global Industry Classification Standard (“GICS”); however, the sector classifications used by the portfolio management team may differ from GICS. The percentage shown for each investment category reflects the value of investments in that category as a percentage of market value (excluding investments in the securities lending reinvestment vehicle, if any). The graph depicts the Fund’s investments but may not represent the Fund’s market exposure due to the exclusion of certain derivatives, if any, as listed in the Additional Investment Information section of the Schedule of Investments.

For more information about your Fund, please refer to www.GSAMFUNDS.com. There, you can learn more about your Fund’s investment strategies, holdings, and performance.

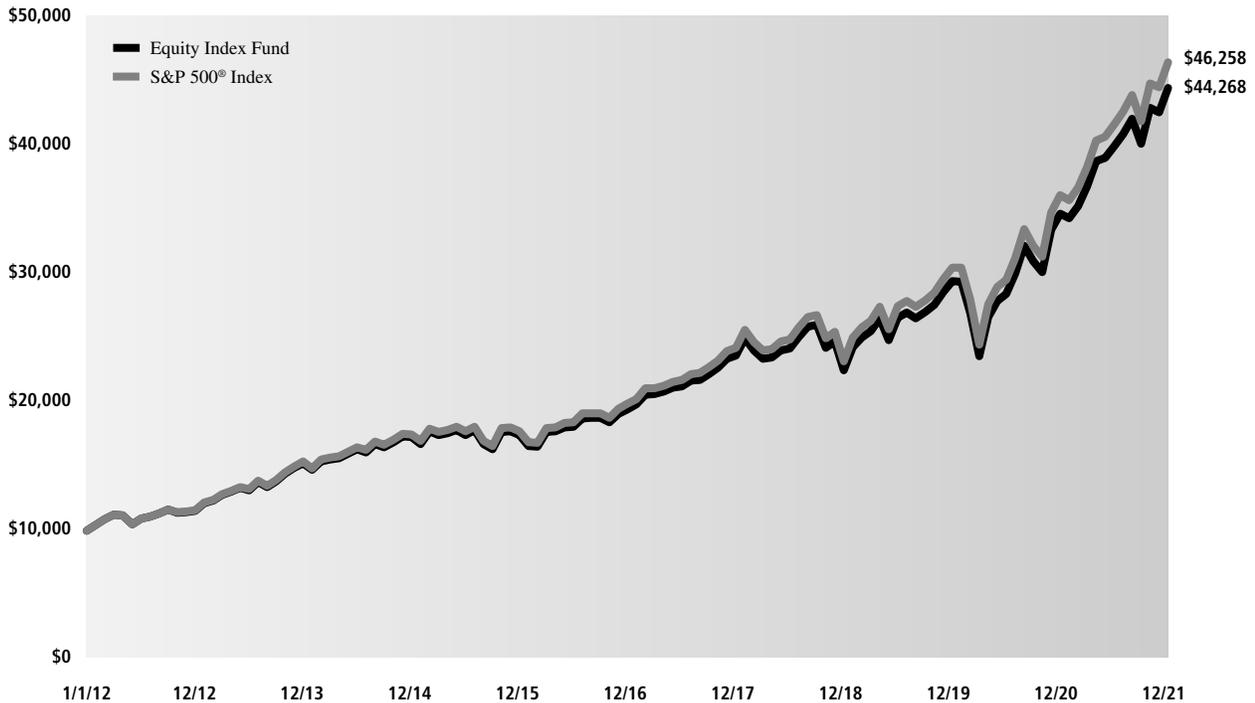

Performance Summary

December 31, 2021

The following graph shows the value, as of December 31, 2021, of a \$10,000 investment made in the Service Shares of Fund on January 1, 2012 at NAV. For comparative purposes, the performance of the Fund's benchmark, the S&P 500® Index (with distributions reinvested), is shown. Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown and in their absence, performance would be reduced. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. The returns set forth below represent past performance. Past performance does not guarantee future results. The Fund's investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted below. Please visit our web site at www.GSAMFUNDS.com to obtain the most recent month-end returns.

Equity Index Fund's 10 Year Performance

Performance of a \$10,000 investment, with distributions reinvested, from January 1, 2012 through December 31, 2021.

Average Annual Total Return through December 31, 2021	One Year	Five Years	Ten Years
Equity Index Fund	28.20%	17.93%	16.03%

INVESTMENT OBJECTIVE

The Fund seeks long-term growth of capital.

Portfolio Management Discussion and Analysis

Below, the Goldman Sachs Growth Investment Team discusses the Goldman Sachs Variable Insurance Trust — Goldman Sachs Growth Opportunities Fund's (the "Fund") performance and positioning for the 12-month period ended December 31, 2021 (the "Reporting Period").

How did the Fund perform during the Reporting Period?

During the Reporting Period, the Fund's Institutional and Service Shares generated average annual total returns of 11.65% and 11.48%, respectively. These returns compare to the 12.73% average annual total return of the Fund's benchmark, the Russell Midcap[®] Growth Index (with dividends reinvested) (the "Russell Index"), during the same time period.

What key factors were responsible for the Fund's performance during the Reporting Period?

During the Reporting Period, the Fund generated double-digit positive absolute returns but underperformed the Russell Index. Both sector positioning and security selection detracted from relative returns.

Which equity market sectors helped and hurt Fund performance?

Our bottom-up approach focuses on security selection, and therefore, we do not make active sector-level investment decisions. The Fund's sector positioning is a result of our stock selection. That said, on a sector level, stock selection in the health care, information technology and materials sectors detracted from relative performance. Stock selection in the consumer discretionary, communication services and energy sectors contributed positively.

Which individual stocks detracted from the Fund's relative performance during the Reporting Period?

RingCentral, Danimer Scientific and Utz Brands detracted most from the Fund's performance relative to the Russell Index during the Reporting Period.

The Fund's top detractor was RingCentral, which provides global enterprise cloud communications and collaboration solutions. Its shares declined following a debt issuance in mid-March 2021. Its stock price fell further following the announcement that RingCentral had agreed to acquire the technology and engineering arm of Kindite. Later in the Reporting Period, the company endured a series of executive departures. Nevertheless, RingCentral continued to deliver strong quarterly results and offered a favorable risk/reward profile, in our opinion. At the end of the Reporting Period, we maintained our positive view on RingCentral because of its strong new customer acquisition, lower churn rate and growing partnerships with telecommunications companies, such as AT&T and Vodaphone. (The churn rate, also known as the rate of attrition, is the percentage of customers to a service who discontinue their subscriptions to that service within a given time period.)

Danimer Scientific is a bioplastics company focused on biodegradable materials. Its shares depreciated through much of the Reporting Period due to speculative sell-offs, reports of investors holding short positions in the stock, and an acquisition that was viewed unfavorably by the market. As the Reporting Period ended, we continued to monitor the Fund's position closely but also believed Danimer Scientific could be a beneficiary of corporate and regulatory efforts to reduce the use of petrochemicals and single-use plastics. In our view, the company is one of the only commercially viable options in biodegradable plastics, and we saw a potentially compelling opportunity for it going forward.

Utz Brands manufactures, markets and distributes branded snacking products. Its stock declined after the company missed consensus expectations on both its top-line and bottom-line results in the first quarter of 2021—the second consecutive quarter in which Utz Brands had lost some share of its core market. However, the company reported sales that grew in line with the salty snacks market and continued to gain share as it expanded into the emerging markets. In addition, Utz Brands significantly revised its full year 2021 guidance due to the impact of higher inflation and subsequent input price pressures. At the end of the Reporting Period, we continued to like the stock given what we saw as the company's pricing power, productivity, synergies in mergers and acquisitions, and distribution opportunities once near-term inflation pressures subside.

Which individual stocks added to the Fund's relative performance during the Reporting Period?

During the Reporting Period, the Fund was helped most versus the Russell Index by investments in Marvell Technology, HubSpot and West Pharmaceutical Services.

Marvell Technology, which provides data infrastructure semiconductor solutions, was the Fund's top contributor during the Reporting Period. Its shares appreciated in response to a second quarter 2021 earnings report that was better than consensus expectations. Then, in early December, the company delivered another strong quarter of performance, highlighted by its ability to better fulfill backlogged orders. Additionally, the backlog of business actually increased, signifying the further demand for Marvell Technology's products. We remained positive on its stock at the end of the Reporting Period, given our view of its management's history of execution and the company's exposure to structural growth trends in cloud-based technology, automobile electronics and fifth-generation ("5G") networks.

HubSpot is a developer of Internet marketing software solutions. Its stock price rose after the company announced the launch of Operations Hub, which aims to make the sales process more efficient, coordinated, automated and based on a synced set of customer data. The positive momentum continued through the end of the Reporting Period, with its earnings announcements fueling the progress. At the end of the Reporting Period, we remained optimistic that HubSpot would benefit from a shift in demand to front office software, as business activities continued to become more virtual.

West Pharmaceutical Services manufactures and markets pharmaceuticals, biologics, vaccines and consumer health care products. The company continued to benefit during the Reporting Period from an operating environment in which demand for its services was at a record high. The COVID-19 pandemic was also a catalyst for the adoption of West Pharmaceutical Services' high-value products, sparking further production to meet demand. At the end of the Reporting Period, we continued to see material tailwinds for the company and believed in its ability to execute moving forward.

Did the Fund make any significant purchases or sales during the Reporting Period?

Among the positions initiated by the Fund during the Reporting Period was an investment in Zscaler. We have a positive view of the cloud-based information security company's pipeline growth in an elevated threat environment, the secular shift toward cloud adoption and Zscaler's continued investment in its platform to support increased growth.

We established a Fund position in Keysight Technologies, a communications, networking and electronics industries company. The deployment of 5G as well as a cyclical rebound in industrial spending leads us to believe its stock may outperform in the near term.

Conversely, during the Reporting Period, we sold the Fund's position in U.S. cloud communications company Twilio. Because we did not expect our investment thesis to unfold in the near term, we eliminated the position and reallocated the capital to what we considered more attractive risk/reward opportunities.

We exited the Fund's position in cloud services company Akamai Technologies. In February 2021, it became apparent to us that our investment thesis was unlikely to play out in the near term, which led us sell the position and reallocate the capital to what we saw as more attractive investment opportunities.

Were there any notable changes in the Fund's weightings during the Reporting Period?

Changes to the Fund's sector weightings relative to the Russell Index are due to our stock selection. As a result of these decisions during the Reporting Period, the Fund moved from an overweight versus the Russell Index in the consumer discretionary sector to an underweight position. In addition, it changed from rather neutral positions in consumer staples and health care to overweight positions and from rather neutral positions in financials and real estate to underweight positions. Compared to the Russell Index, the Fund shifted from an underweight in the communication services sector to an overweight position. Also, the Fund's overweight positions in the industrials and materials sectors increased during the Reporting Period.

How did the Fund use derivatives and similar instruments during the Reporting Period?

The Fund did not use derivatives or similar instruments within its investment process during the Reporting Period.

Were there any changes to the Fund's portfolio management team during the Reporting Period?

There were no changes to the Fund's portfolio management team during the Reporting Period.

How was the Fund positioned relative to the Russell Index at the end of the Reporting Period?

As mentioned, the Fund's sector positioning relative to the Russell Index is the result of our stock selection, as we take a pure bottom-up, research-intensive approach to investing. From that perspective, then, at the end of the Reporting Period, the Fund's

portfolio was broadly diversified with overweight positions compared to the Russell Index in the industrials, health care, materials, consumer staples and communication services sectors. The Fund had smaller weightings than the Russell Index in the information technology, consumer discretionary, financials and real estate sectors. At the end of the Reporting Period, the Fund was relatively neutral compared to the Russell Index in the energy sector and had no exposure to the utilities sector.

What is the Fund's tactical view and strategy for the months ahead?

The end of 2021 was cast with the development of the Omicron variant of COVID-19, which we expected at the end of the Reporting Period to remain a major focus of the U.S. equity markets in the first quarter of 2022, as entities around the world continued to navigate pockets of outbreaks and implement responses accordingly. Other major themes, such as the acceleration in the Fed's winding down of its asset purchasing program and hiking of interest rates as well as inflation readings, supply-chain issues and the global energy shortage may test the markets again. The unclear future of the U.S. Administration's social spending bill will likely also be in play in early 2022.

Regardless of market direction, we intend to stay true to our quality-first investment approach and seek to invest in businesses with healthy balance sheets, relatively stable cash flows and differentiated business models aligned to secular tailwinds. We continue to test our models and re-evaluate our assumptions with increasing information, remain focused on the long-term investment horizon and believe this fundamental approach can generate added value in the long run. As always, we maintain our focus on seeking companies that we believe will generate long-term growth in today's ever-changing market conditions.

FUND VS. BENCHMARK SECTOR ALLOCATIONS²

As of December 31, 2021

² The Fund is actively managed and, as such, its composition may differ over time. Consequently, the Fund’s overall sector allocations may differ from percentages contained in the graph above. The graph categorizes investments using Global Industry Classification Standard (“GICS”); however, the sector classifications used by the portfolio management team may differ from GICS. The percentage shown for each investment category reflects the value of investments in that category as a percentage of market value (excluding investments in the securities lending reinvestment vehicle, if any). Underlying sector allocations of exchange traded funds and investment companies held by the Fund are not reflected in the graph above. Investments in the securities lending reinvestment vehicle represented 0.9% of the Fund’s net assets at December 31, 2021.

Performance Summary

December 31, 2021

The following graph shows the value, as of December 31, 2021, of a \$10,000 investment made on January 1, 2012 in Institutional Shares at NAV. For comparative purposes, the performance of the Fund’s benchmark, the Russell Midcap® Growth Index (with distributions reinvested), is shown. Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown and in their absence, performance would be reduced. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. The returns set forth below represent past performance. Past performance does not guarantee future results. The Fund’s investment return and principal value will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted below. Please visit our web site at www.GSAMFUNDS.com to obtain the most recent month-end returns.

Growth Opportunities Fund’s 10 Year Performance

Service	11.48%	21.22%	16.00%	—

INVESTMENT OBJECTIVE

The Fund seeks long-term growth of capital.

Portfolio Management Discussion and Analysis

Below, the Goldman Sachs Quantitative Investment Strategies Team discuss the Goldman Sachs Variable Insurance Trust — Goldman Sachs International Equity Insights Fund's (the "Fund") performance and positioning for the 12-month period ended December 31, 2021 (the "Reporting Period").

How did the Fund perform during the Reporting Period?

During the Reporting Period, the Fund's Institutional and Service Shares generated average annual total returns of 12.17% and 11.81%, respectively. These returns compare to the 11.26% average annual total return of the Fund's benchmark, the MSCI Europe, Australasia, Far East (EAFE) Standard Index (net, USD, unhedged) (the "MSCI EAFE Index"), during the same time period.

What key factors were responsible for the Fund's performance during the Reporting Period?

The Fund uses a quantitative style of management, in combination with a qualitative overlay, that emphasizes fundamentally-based stock and country/currency selection, careful portfolio construction and efficient implementation.

During the Reporting Period, the Fund posted double-digit absolute gains and outperformed the MSCI EAFE Index, with each of our quantitative model's four investment themes contributing positively to results. Stock selection overall, driven by these investment themes, boosted relative performance.

Which investment themes helped and which hurt within the Team's stock selection strategy?

In keeping with our investment approach, we use our quantitative model and four investment themes to take a long-term view of market patterns and look for inefficiencies, selecting stocks for the Fund and overweighting or underweighting the ones chosen by the model. Over time and by design, the performance of any one of the model's investment themes tends to have a low correlation with the model's other themes, demonstrating the diversification benefit of the Fund's theme-driven quantitative model. The variance in performance supports our research indicating that the diversification provided by the Fund's different investment themes is a significant investment advantage over the long term, even though the Fund may experience underperformance in the short term. Of course, diversification does not protect an investor from market risk nor does it ensure a profit.

As mentioned, during the Reporting Period, each of our investment themes contributed positively to the Fund's relative returns. Sentiment Analysis added most, followed by Market Themes & Trends, Fundamental Mispricings and High Quality Business Models. Sentiment Analysis seeks to identify stocks experiencing improvements in their overall market sentiment. Market Themes & Trends seeks to identify companies positively positioned to benefit from themes and trends in the market and macroeconomic environment. Fundamental Mispricings seeks to identify high quality businesses trading at a fair price, which we believe may lead to strong performance over the long run. High Quality Business Models seeks to identify companies that are generating high quality revenues with sustainable business models and aligned management incentives.

How did the Fund's sector and industry allocations affect relative performance during the Reporting Period?

In constructing the Fund's portfolio, we focus on picking stocks rather than making sector or industry bets. Consequently, the Fund is similar to its benchmark, the MSCI EAFE Index, in terms of its sector and industry allocations and style. Relative performance is primarily driven by stock selection, not by sector or industry allocations.

Did stock selection help or hurt Fund performance during the Reporting Period?

We seek to outpace the MSCI EAFE Index by overweighting stocks that we expect to outperform and underweighting those that we think may lag. At the same time, we strive to maintain a risk profile similar to the MSCI EAFE Index. The Fund's investments are selected using fundamental research and a variety of quantitative techniques based on our investment themes. For example, the Fund aims to hold a basket of stocks with better Fundamental Mispricings characteristics than the benchmark index.

During the Reporting Period, stock selection overall helped the Fund's performance, with investments in the industrials, information technology and health care sectors contributing most positively to results relative to the MSCI EAFE Index. Holdings in the consumer discretionary, financials and materials sectors detracted most.

Which individual stock positions contributed the most to the Fund's relative returns during the Reporting Period?

The Fund benefited most from overweight positions in Japan-based marine transportation services provider Nippon Yusen, Netherlands-based semiconductor machinery manufacturer ASM International and Japan-based marine transportation, warehousing and cargo handling services provider Mitsui OSK Lines. The overweight in Nippon Yusen was fueled mainly by our Market Themes & Trends and Fundamental Mispricings investment themes. The overweight in ASM International was based primarily on our Sentiment Analysis and Market Themes & Trends investment themes. Driven mostly by our Market Themes & Trends investment theme, the Fund benefited from its overweight in Mitsui OSK Lines.

Which individual positions detracted from the Fund's results during the Reporting Period?

Detracting most from the Fund's results relative to the MSCI EAFE Index were underweight positions in Japan-based electronics products manufacturer and distributor Sony Group, Switzerland-based packaged food company Nestle and Switzerland-based luxury goods manufacturer and retailer Compagnie Financiere Richemont. The underweight in Sony Group was implemented primarily because of our Market Themes & Trends investment theme. The underweights in Nestle and Compagnie Financiere Richemont were each based primarily on our High Quality Business Models investment theme.

What impact did country selection have on the Fund's relative performance during the Reporting Period?

Compared to the MSCI EAFE Index, the Fund was helped most by its positioning in France, the Netherlands and Germany. Positioning in Switzerland, Japan and Sweden detracted most from the Fund's relative results during the Reporting Period.

We made our picks using our proprietary models, which, during the Reporting Period, were based on five investment themes specific to our country/currency strategy — Valuation, Momentum, Risk Premium, Fund Flows and Macro. Valuation favors equity and currency markets that appear cheap relative to accounting measures of value and purchasing power. Momentum favors countries and currencies that have had strong recent outperformance. Risk Premium evaluates whether a country is overcompensating investors for various types of risk, while Fund Flows evaluates the strength of capital market inflows. Finally, Macro assesses a market's macroeconomic environment and growth prospects.

Did you make any enhancements to your quantitative models during the Reporting Period?

We continuously look for ways to improve our investment process. During the first half of the Reporting Period, we introduced several new signals into our models. For example, we introduced new signals within our Sentiment Analysis investment theme, which were rolled out across the majority of regions, including the U.S., emerging markets, Japan and Europe. These signals are an extension to our existing suite of signals that focus on institutional positioning and capture sentiment associated with outstanding short-interest for specific names. The new signals focus on short positions by institutional investors and seek to identify which ones may have been covered prematurely or maintained beyond their optimal duration. Additionally, within our High Quality Business Models investment theme, we introduced another signal to our existing suite of alternative growth signals, also across multiple regions, including the U.S., emerging markets, Japan and Europe. This signal seeks to identify companies that exhibit elevated levels of demand for their products and services based on trends identified from consumer Internet activity data. While we believe these types of trends can help provide additional insight on the global demand for certain products and services, we have also closely focused on developing our own process to identify which individual companies are most highly exposed to specific trends.

During the second half of the Reporting Period, we introduced several new signals into our models, mostly in the fourth quarter of 2021. For example, within our Market Themes & Trends investment theme, we introduced a new signal, rolled out across all regions, that focused on macro market environments and assesses similarities between market events from the past and the current environment. The signal evaluates the historical performance of the stock in similar market conditions to predict future stock returns. Finally, we introduced two signals within our Sentiment Analysis investment theme. One signal, rolled out across all developed market regions, uses short sales transaction data to help identify potential sustained stock selloffs, expanding upon our existing factors that leverage short sales and short interest data. The other signal, introduced in the emerging markets region, analyzes flows from local versus foreign registered investors, and seeks to anticipate the stock price impact caused by these flows and their subsequent trading activity.

How did the Fund use derivatives during the Reporting Period?

During the Reporting Period, we used equity index futures contracts, on an opportunistic basis, to equitize the Fund's cash holdings. In other words, we put the Fund's cash holdings to work by using them as collateral for the purchase of stock futures. We also used forward foreign currency exchange contracts to avoid unintended local currency exposure when buying and selling stocks. The use of these derivatives did not have a material impact on Fund results during the Reporting Period.

What changes did you make to the Fund's country weightings during the Reporting Period?

During the Reporting Period, we increased the Fund's positions relative to the MSCI EAFE Index in Norway, Sweden, Germany, France and the U.K. We decreased the Fund's positions relative to the MSCI EAFE Index in the Netherlands, Italy, Switzerland and Belgium.

What were the Fund's sector and country weightings at the end of the Reporting Period?

As of December 31, 2021, the Fund was overweight the industrials and information technology sectors relative to the MSCI EAFE Index. The Fund was underweight consumer staples and health care and was rather neutral to the MSCI EAFE Index in communication services, consumer discretionary, materials, real estate, financials, energy and utilities on the same date.

In terms of countries, the Fund was overweight relative to the MSCI EAFE Index in Japan, France, Norway and Sweden at the end of the Reporting Period. Compared to the MSCI EAFE Index, the Fund was underweight in Switzerland and the U.K. and was relatively neutral compared to the MSCI EAFE Index in the remaining constituents of the MSCI EAFE Index at the end of the Reporting Period.

Were there any changes to the Fund's portfolio management team during the Reporting Period?

In early 2021, Dennis Walsh, Managing Director and Senior Portfolio Manager, became a co-portfolio manager for the Fund. Mr. Walsh joined Len Ioffe, Managing Director and Senior Portfolio Manager, Osman Ali, Managing Director and Senior Portfolio Manager, and Takashi Suwabe, Managing Director and Senior Portfolio Manager, all of whom have managed the Fund since 2018. By design, all investment decisions for the Fund are performed within a co-lead or team structure.

What is your strategy going forward for the Fund?

Looking ahead, we continue to believe that less expensive stocks should outpace more expensive stocks, and stocks with good momentum are likely to outperform those with poor momentum. We intend to maintain our focus on seeking companies about which fundamental research analysts are becoming more positive as well as profitable companies with sustainable earnings and a track record of using their capital to enhance shareholder value. As such, we anticipate remaining fully invested with long-term performance likely to be the result of stock selection rather than sector or capitalization allocations.

We stand behind our investment philosophy that sound economic investment principles, coupled with a disciplined quantitative approach, can provide strong, uncorrelated returns over the long term. Our research agenda is robust, and we continue to enhance our existing models, add new proprietary forecasting signals and improve our trading execution as we seek to provide the most value to our shareholders.

Service	11.81%	8.20%	7.20%

INVESTMENT OBJECTIVE

The Fund seeks long-term capital appreciation.

Portfolio Management Discussion and Analysis

Below, the Goldman Sachs Fundamental Equity U.S. Equity Portfolio Management Team discusses the Goldman Sachs Variable Insurance Trust — Goldman Sachs Large Cap Value Fund's (the "Fund") performance and positioning for the 12-month period ended December 31, 2021 (the "Reporting Period").

How did the Fund perform during the Reporting Period?

During the Reporting Period, the Fund's Institutional and Service Shares generated average annual total returns of 24.13% and 23.93%, respectively. These returns compare to the 25.16% average annual total return of the Fund's benchmark, the Russell 1000® Value Index (with dividends reinvested) (the "Russell Index") during the same time period.

What key factors were responsible for the Fund's performance during the Reporting Period?

The Fund posted solid absolute gains but underperformed the Russell Index during the Reporting Period due to a combination of stock selection and sector allocation decisions overall.

Which equity market sectors most significantly affected Fund performance?

Stock selection in the health care and utilities sectors detracted most from the Fund's relative results during the Reporting Period. Having an underweight to financials, which outpaced the Russell Index during the Reporting Period, further dampened relative results. Partially offsetting these detractors was stock selection in the consumer discretionary and real estate sectors, which contributed positively to the Fund's relative results during the Reporting Period. Having an underweight to communication services, which notably lagged the Russell Index during the Reporting Period, also helped.

Which stocks detracted significantly from the Fund's performance during the Reporting Period?

Among those companies detracting most from the Fund's results relative to the Russell Index were positions in Zimmer Biomet Holdings, Fidelity National Information Services and Splunk.

Musculoskeletal health care services company Zimmer Biomet Holdings was the top detractor from the Fund's results during the Reporting Period. The spread of the COVID-19 Delta and Omicron variants limited hospital capacity and patient demand for orthopedics procedures. Despite its earnings per share consistently beating consensus estimates, the company's hips and knees business segments missed expectations, and the company narrowed its full-year guidance to the lower end of its initial range. At the end of the Reporting Period, we remained confident in the company's innovative robotic ROSA platform and its growth potential in the long run, especially with new products being introduced and procedure levels eventually increasing toward pre-COVID-19 levels.

Technology services provider Fidelity National Information Services detracted, largely because the competitive landscape shifted following recent merger and acquisition within the industry. This shift applied price pressure on the company's stock as did talks around selling its capital markets business. Further, the company's second quarter 2021 earnings release revealed smaller earnings per share guidance relative to consensus expectations and lower implied margin as a result of incremental incentive accruals and the upfront impact of new business wins. At the end of the Reporting Period, we believed Fidelity National Information Services' global footprint and presence in the banking industry was well positioned to take advantage of accelerating payments innovations globally and felt the company should benefit from improving spending fundamentals.

Splunk engages in the development and marketing of software solutions. During the first quarter of 2021, its shares declined in line with the broad information technology sector and then further depreciated following the news of the departures of several senior company leaders. Later in the year, Splunk's Chief Executive Office announced his retirement as well. Though headwinds remained, at the end of the Reporting Period, we were still confident in Splunk's prospects given its transition to a subscription-based pricing model, its near-term upsell opportunity with its existing renewal base, and what we saw as its relatively inexpensive valuation.

What were some of the Fund's best-performing individual stocks?

Relative to the Russell Index, the Fund benefited most from positions in Marvell Technology, Bath & Body Works and Alphabet.

Marvell Technology's stock price appreciated along with an earnings report during the second quarter of 2021 that was better than consensus expectations. Then, in early December 2021, the company delivered another strong quarter of performance, highlighted by its ability to better fulfill backlogged orders. Additionally, the backlog of business actually increased, signifying the further demand for Marvell Technology's products. At the end of the Reporting Period, we remained positive on Marvell Technology given our view of its management's history of execution and the company's exposure to structural growth trends in cloud, autos and fifth-generation ("5G") technologies.

Bath & Body Works, a new purchase for the Fund during the Reporting Period, engages in the operation of retail stores, specializing in domestic merchandise and home furnishings. Its stock price rose significantly in the early months of 2021, largely due to the retail trading environment. However, the lack of fundamental drivers behind the price appreciation led us to be cautious. We ultimately decided to capture the Fund's profits and exit the position in June 2021 in favor of what we saw as other more attractive risk/reward opportunities.

Alphabet is a holding company that engages in advertising, digital content, applications, cloud offerings and more through its subsidiaries, including its largest, Google. During the Reporting Period, the company benefited from a solid recovery in the search business as well as from significant growth in its YouTube and Cloud businesses. It had become clear to many that the broad advertising market was recovering, and virtually all of the major Internet players were benefiting — all while Alphabet continued to show real cost discipline, in our view. At the end of the Reporting Period, we remained optimistic about Alphabet, as advertising spending and travel were improving, which we believe could further benefit the company.

How did the Fund use derivatives and similar instruments during the Reporting Period?

During the Reporting Period, we did not use derivatives as part of an active management strategy.

Did the Fund make any significant purchases or sales during the Reporting Period?

During the Reporting Period, we initiated a Fund position in banking and nonbank financial services company Bank of America. We believe holding the name in the Fund's portfolio will help maintain balance from an interest rate sensitivity and capital return perspective. We also believe Bank of America is generally well positioned with a strong deposit base over the long term.

We established a Fund position in cloud-based customer relationship management software provider salesforce.com during the Reporting Period. Despite its disappointing quarterly results in December 2021, we still see ample room for organic growth and believe its integration with Slack, the proprietary communication platform of Slack Technologies, will likely continue to benefit the company moving forward.

Conversely, we exited the Fund's position in telecommunications company Verizon Communications during the Reporting Period. While we continue to like the long-term outlook for the company, we sold the position in favor of what we believed to be better risk/reward prospects within the industry.

We eliminated the Fund's position in financial services company Wells Fargo & Co. as a result of concerns that the Federal Reserve's ("Fed") asset cap on the bank may create headwinds for longer than we previously anticipated. Despite these concerns, we intend to continue to monitor the stock, as we remained optimistic about some of the company's efficiency efforts and believe there may be an opportunity for growth once the asset cap is removed.

Were there any notable changes in the Fund's weightings during the Reporting Period?

In constructing the Fund's portfolio, we focus on picking stocks rather than on making industry or sector bets. We seek to outpace the benchmark index by overweighting stocks that we expect to outperform and underweighting those that we think may lag. Consequently, changes in its sector weights are generally the direct result of individual stock selection or of stock appreciation or depreciation. That said, during the Reporting Period, the Fund's exposure compared to the Russell Index to consumer staples, financials, health care and materials increased. The Fund's allocations compared to the Russell Index in communication services, consumer discretionary and utilities decreased.

How was the Fund positioned relative to its benchmark index at the end of the Reporting Period?

At the end of December 2021, the Fund had overweighted positions relative to the Russell Index in the information technology, materials and consumer staples sectors. On the same date, the Fund had underweighted positions compared to the Russell Index in communication services and industrials and was rather neutrally weighted to the Russell Index in the consumer discretionary, energy, financials, health care, real estate and utilities sectors.

Were there any changes to the Fund's portfolio management team during the Reporting Period?

There were no changes to the Fund's portfolio management team during the Reporting Period.

What is the Fund's tactical view and strategy for the months ahead?

The end of 2021 was cast with the development of the Omicron variant of COVID-19, which we expected at the end of the Reporting Period to remain a major focus of the U.S. equity markets in the first quarter of 2022, as entities around the world continued to navigate pockets of outbreaks and implement responses accordingly. Other major themes, such as the acceleration in the Fed's winding down of its asset purchasing program and hiking of interest rates as well as inflation readings, supply-chain issues and the global energy shortage may test the markets again. The unclear future of the U.S. Administration's social spending bill will likely also be in play in early 2022.

Regardless of market direction, we intend to stay true to our quality-first investment approach and seek to invest in businesses with healthy balance sheets, relatively stable cash flows and differentiated business models aligned to secular tailwinds. We continue to test our models and re-evaluate our assumptions with increasing information, remain focused on the long-term investment horizon and believe this fundamental approach can generate added value in the long run. As always, we maintain our focus on undervalued companies that we believe have comparatively greater control of their own destiny, such as innovators with differentiated products, companies with low cost structures or companies that have been investing in their own businesses and may be poised to gain market share.

Service	23.93%	10.06%	11.79%

INVESTMENT OBJECTIVE

The Fund seeks long-term capital appreciation.

Portfolio Management Discussion and Analysis

Below, the Goldman Sachs Fundamental Equity U.S. Equity Portfolio Management Team discusses the Goldman Sachs Variable Insurance Trust — Goldman Sachs Mid Cap Value Fund's (the "Fund") performance and positioning for the 12-month period ended December 31, 2021 (the "Reporting Period").

How did the Fund perform during the Reporting Period?

During the Reporting Period, the Fund's Institutional and Service Shares generated average annual total returns of 30.95% and 30.57%, respectively. These returns compare to the 28.34% average annual total return of the Fund's benchmark, the Russell Midcap[®] Value Index (with dividends reinvested) (the "Russell Index"), during the same time period.

What key factors were responsible for the Fund's performance during the Reporting Period?

The Fund posted double-digit absolute gains that outperformed the Russell Index during the Reporting Period due primarily to stock selection overall. Sector allocation as a whole also contributed positively, albeit more modestly, to the Fund's performance relative to the Russell Index during the Reporting Period.

Which equity market sectors most significantly affected Fund performance?

Contributing most positively to the Fund's relative results during the Reporting Period was effective stock selection in the information technology, financials and consumer discretionary sectors. Detracting most from the Fund's relative results during the Reporting Period were the consumer staples, industrials and communication services sectors, wherein stock selection proved especially challenging.

What were some of the Fund's best-performing individual stocks?

The Fund benefited most relative to the Russell Index from positions in ON Semiconductor, Old Dominion Freight Lines and Bath & Body Works.

ON Semiconductor engages in the design, manufacture and marketing of a portfolio of semiconductor components. The Reporting Period was a strong year for many semiconductor firms, and ON Semiconductor was no exception. Its results were also driven by strong quarterly earnings releases, featuring what we saw as impressive margins and top-line revenue amidst ongoing supply-chain constraints. At the end of the Reporting Period, we continued to view the company as one of our favorite semiconductor names in the mid-cap segment of the U.S. equity market.

Old Dominion Freight Lines provides less-than-truckload services. The operating environment that dominated the Reporting Period led to Old Dominion Freight Lines' services being in high demand throughout. One reason it was able to keep up with the demand was the company culture that its senior management has built. As a result, the company has hardly been affected by the nationwide labor shortage. Its technological progress also improved its operational efficiency and margins while leaving room for technological growth. At the end of the Reporting Period, we continued to believe the company was the leading player in a capacity-constrained and structurally-growing less-than-truckload space.

Bath & Body Works engages in the operation of retail stores, specializing in domestics merchandise and home furnishings. Its stock price rose significantly in the early months of 2021, largely due to the retail trading environment. However, the lack of fundamental drivers behind the price appreciation led us to be cautious. Still, at the end of the Reporting Period, we continued to see positive momentum potential among consumer purchases, demonstrating loyalty to the Bath & Body Works product offering.

Which stocks detracted significantly from the Fund's performance during the Reporting Period?

Detracting from the Fund's results relative to the Russell Index were positions in Zimmer Biomet Holdings, Wynn Resorts and ViacomCBS.

Musculoskeletal health care services company Zimmer Biomet Holdings was the top detractor from the Fund's results during the Reporting Period. The spread of the COVID-19 Delta and Omicron variants limited hospital capacity and patient demand for orthopedics procedures. Despite its earnings per share consistently beating consensus estimates, the company's hips and knees

business segments missed expectations, and the company narrowed its full-year guidance to the lower end of its initial range. At the end of the Reporting Period, we remained confident in the company's innovative robotic ROSA platform and its growth potential in the long run, especially with new products being introduced and procedure levels eventually increasing toward pre-COVID-19 levels.

High-end hotel and casino developer and operator Wynn Resorts saw its stock depreciate after missing earnings estimates during the Reporting Period. We exited the Fund's position in Wynn Resorts, as new regulatory changes were proposed in Macau, including increases in government scrutiny around capital use and return, competition and enforcement, together hampering the company's potential long-term growth, in our view.

Telecommunications company ViacomCBS was a new purchase for the Fund during the Reporting Period. Its shares declined, though much of its underperformance of the Russell Index was driven by technical rather than fundamental factors attributable to the end of the first calendar quarter and through the second quarter of 2021. We ultimately decided to exit the position, as we felt the competitive landscape was oversaturated in streaming services, and we believed there were better risk/reward opportunities elsewhere.

How did the Fund use derivatives and similar instruments during the Reporting Period?

During the Reporting Period, we did not use derivatives as part of an active management strategy.

Did the Fund make any significant purchases or sales during the Reporting Period?

We initiated a Fund position in pharmaceutical and business solutions provider AmerisourceBergen during the Reporting Period. The fundamental backdrop for drug distributors has dramatically changed after facing a series of headwinds during the past few years. We believe the company can now get back to focusing on earnings per share growth compounding, which should, in our view, lead to more favorable multiples, or price/earnings ratios.

We established a Fund position in oil and gas exploration and production company Devon Energy during the Reporting Period. We are optimistic about the company, as its management continues to emphasize the importance of free cash flow generation over the pursuit of volume growth, along with what we see as ample dividends being returned to shareholders. We will continue to carefully monitor 2022 production figures as well as the company's debt reduction timeline.

Conversely, in addition to the sales already mentioned, we exited the Fund's position in agriculture company Corteva during the Reporting Period. Corteva was, in our view, executing well on taking share across seed and crop protection and also was managing an effective cost savings plan. We simply preferred other names and decided to sell.

We sold the Fund's position in payment transaction company Discover Financial Services during the Reporting Period. Even though we see spending trends as strong, we believe that view is already mostly priced in to the company's stock valuation. Furthermore, credit conditions appear to us to have peaked and the competitive landscape is shifting with fintech names becoming a larger threat. (Financial technology, or fintech, is used to describe new technology that seeks to improve and automate the delivery and use of financial services.) Ultimately, we eliminated the position in favor of what we believe to be more attractive risk/reward opportunities.

Were there any notable changes in the Fund's weightings during the Reporting Period?

In constructing the Fund's portfolio, we focus on picking stocks rather than on making industry or sector bets. We seek to outpace the benchmark index by overweighting stocks that we expect to outperform and underweighting those that we think may lag. Consequently, changes in its sector weights are generally the direct result of individual stock selection or of stock appreciation or depreciation. That said, during the Reporting Period, the Fund's exposure to energy, industrials and utilities increased and its exposure to consumer staples, financials, health care and information technology decreased compared to the Russell Index.

How was the Fund positioned relative to its benchmark index at the end of the Reporting Period?

At the end of December 2021, the Fund had overweighted positions relative to the Russell Index in industrials and utilities. On the same date, the Fund had underweighted positions compared to the Russell Index in real estate and consumer discretionary and was rather neutrally weighted to the Russell Index in communication services, consumer staples, energy, financials, health care, information technology and materials.

Were there any changes to the Fund's portfolio management team during the Reporting Period?

In early 2021, co-lead portfolio manager Adam Agress left the firm. Sung Cho, managing director and portfolio manager for the Fund alongside Adam, assumed his portfolio management responsibilities for the Fund. Sung joined Goldman Sachs Asset

Management in 2004 and has 20 years of investment experience. He has been a lead portfolio manager for the U.S. Mid Cap Value strategy since 2015. Sung will continue to leverage the expertise of more than 20 investment professionals as part of the Fundamental Equity U.S. Equity team.

By design, all investment decisions for the Fund are performed within a team structure, with multiple subject matter experts. This strategic decision making has been the cornerstone of our approach and ensures continuity in the Fund.

What is the Fund's tactical view and strategy for the months ahead?

The end of 2021 was cast with the development of the Omicron variant of COVID-19, which we expected at the end of the Reporting Period to remain a major focus of the U.S. equity markets in the first quarter of 2022, as entities around the world continued to navigate pockets of outbreaks and implement responses accordingly. Other major themes, such as the acceleration in the Fed's winding down of its asset purchasing program and hiking of interest rates as well as inflation readings, supply-chain issues and the global energy shortage may test the markets again. The unclear future of the U.S. Administration's social spending bill will likely also be in play in early 2022.

Regardless of market direction, we intend to stay true to our quality-first investment approach and seek to invest in businesses with healthy balance sheets, relatively stable cash flows and differentiated business models aligned to secular tailwinds. We continue to test our models and re-evaluate our assumptions with increasing information, remain focused on the long-term investment horizon and believe this fundamental approach can generate added value in the long run. As always, we maintain our focus on undervalued companies that we believe have comparatively greater control of their own destiny, such as innovators with differentiated products, companies with low cost structures or companies that have been investing in their own businesses and may be poised to gain market share.

FUND vs. BENCHMARK SECTOR ALLOCATIONS²

As of December 31, 2021

² The Fund is actively managed and, as such, its composition may differ over time. Consequently, the Fund's overall sector allocations may differ from percentages contained in the graph above. The graph categorizes investments using Global Industry Classification Standard ("GICS"); however, the sector classifications used by the portfolio management team may differ from GICS. The percentage shown for each investment category reflects the value of investments in that category as a percentage of market value (excluding investments in the securities lending reinvestment vehicle, if any). Underlying sector allocations of exchange traded funds and investment companies held by the Fund are not reflected in the graph above.

For more information about your Fund, please refer to www.GSAMFUNDS.com. There, you can learn more about your Fund's investment strategies, holdings, and performance.

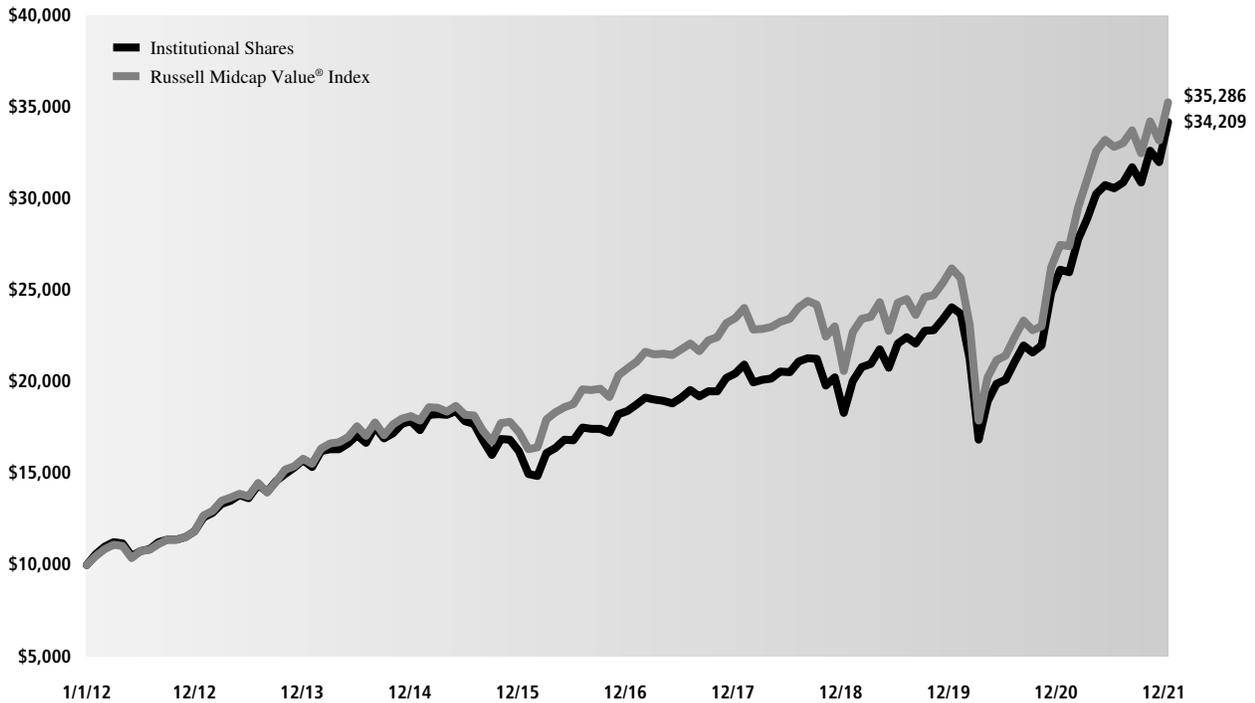

Performance Summary

December 31, 2021

The following graph shows the value, as of December 31, 2021, of a \$10,000 investment made on January 1, 2012 in Institutional Shares at NAV. For comparative purposes, the performance of the Fund’s benchmark, the Russell Midcap Value® Index (with distributions reinvested), is shown. Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown and in their absence, performance would be reduced. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. The returns set forth below represent past performance. Past performance does not guarantee future results. The Fund’s investment return and principal value will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted below. Please visit our web site at www.GSAMFUNDS.com to obtain the most recent month-end returns.

Mid Cap Value Fund’s 10 Year Performance

Performance of a \$10,000 investment, with distributions reinvested, from January 1, 2012 through December 31, 2021.

Average Annual Total Return through December 31, 2021

	One Year	Five Years	Ten Years
Institutional	30.95%	13.17%	13.08%
Service	30.57%	12.89%	12.79%

INVESTMENT OBJECTIVE

The Fund seeks long-term growth of capital.

Portfolio Management Discussion and Analysis

Below, the Goldman Sachs Quantitative Investment Strategies Team discusses the Goldman Sachs Variable Insurance Trust — Goldman Sachs Small Cap Equity Insights Fund's (the "Fund") performance and positioning for the 12-month period ended December 31, 2021 (the "Reporting Period").

How did the Fund perform during the Reporting Period?

During the Reporting Period, the Fund's Institutional and Service Shares generated average annual total returns of 23.79% and 23.50%, respectively. These returns compare to the 14.82% average annual total return of the Fund's benchmark, the Russell 2000® Index (with dividends reinvested) (the "Russell Index") during the same time period.

What key factors were responsible for the Fund's performance during the Reporting Period?

The Fund uses a quantitative style of management, in combination with a qualitative overlay, that emphasizes fundamentally-based stock selection, careful portfolio construction and efficient implementation. The Fund's investments are selected using fundamental research and a variety of quantitative techniques based on certain investment themes, namely Fundamental Mispricings, High Quality Business Models, Sentiment Analysis and Market Themes & Trends.

During the Reporting Period, the Fund outperformed the Russell Index, with all four of our quantitative model's investment themes contributing positively. Stock selection overall, driven by these investment themes, added to relative returns.

What impact did the Fund's investment themes have on performance during the Reporting Period?

In keeping with our investment approach, we use our quantitative model and four investment themes to take a long-term view of market patterns and look for inefficiencies, selecting stocks for the Fund and overweighting or underweighting the ones chosen by the model. Over time and by design, the performance of any one of the model's investment themes tends to have a low correlation with the model's other themes, demonstrating the diversification benefit of the Fund's theme-driven quantitative model. The variance in performance supports our research indicating that the diversification provided by the Fund's different investment themes is a significant investment advantage over the long term, even though the Fund may experience underperformance in the short term. Of course, diversification does not protect an investor from market risk nor does it ensure a profit.

During the Reporting Period, each of our four investment themes contributed positively to the Fund's relative performance. Sentiment Analysis and High Quality Business Models bolstered relative results most, followed at some distance by Fundamental Mispricings and Market Themes & Trends. Sentiment Analysis seeks to identify stocks experiencing improvements in their overall market sentiment. High Quality Business Models seeks to identify companies that are generating high quality revenues with sustainable business models and aligned management incentives. Fundamental Mispricing seeks to identify high quality businesses trading at a fair price, which we believe may lead to strong performance over the long run. Market Themes & Trends seeks to identify companies positively positioned to benefit from themes and trends in the market and macroeconomic environment.

How did the Fund's sector and industry allocations affect relative performance?

In constructing the Fund's portfolio, our quantitative model focuses on stock selection rather than making sector or industry bets. Consequently, the Fund is similar to its benchmark, the Russell Index, in terms of its sector and industry allocations and style. Relative performance is primarily driven by stock selection, not by sector or industry allocations.

Did stock selection help or hurt Fund performance during the Reporting Period?

We seek to outpace the Russell Index by overweighting stocks that we expect to outperform and underweighting those that we think may lag. At the same time, we strive to maintain a risk profile similar to the Russell Index. The Fund's investments are selected using fundamental research and a variety of quantitative techniques based on our investment themes. For example, the Fund aims to hold a basket of stocks with better Fundamental Mispricing characteristics than the Russell Index.

During the Reporting Period, stock selection overall helped the Fund's performance, with investments in the health care, financials and consumer discretionary sectors contributing the most to the Fund's relative returns. Conversely, stock selection in industrials detracted—the only sector to detract from relative results during the Reporting Period.

Which individual stock positions contributed the most to the Fund's relative returns during the Reporting Period?

The Fund benefited most from overweight positions in casino and entertainment properties developer and operator Red Rock Resorts, multi-family properties-focused real estate investment trust NexPoint Residential Trust and components producer for the semiconductor industry Axcelis Technologies. The overweight in Red Rock Resorts was established predominantly due to our High Quality Business Models investment theme. The overweight in NexPoint Residential Trust was driven by our Sentiment Analysis and High Quality Business Models investment themes. The Fund was overweight Axcelis Technologies largely because of our High Quality Business Models and Sentiment Analysis investment themes.

Which individual positions detracted from the Fund's results during the Reporting Period?

Detracting most from the Fund's results relative to the Russell Index were overweight positions in Editas Medicine, a clinical stage genome editing company, and Trupanion, a pet health insurance services provider. An underweight position in vehicle rental operator Avis Budget Group also detracted. The overweight in Editas Medicine was established primarily as a result of our Sentiment Analysis investment theme. Largely because of our Fundamental Mispricings and Market Themes & Trends investment theme, the Fund was overweight Trupanion. The Fund's underweight in Avis Budget Group was driven primarily by our High Quality Business Models and Sentiment Analysis investment themes.

How did the Fund use derivatives during the Reporting Period?

During the Reporting Period, we used equity index futures contracts, on an opportunistic basis, to equitize the Fund's cash holdings. In other words, we put the Fund's cash holdings to work by using them as collateral for the purchase of futures contracts. The use of these derivatives did not have a material impact on the Fund's performance during the Reporting Period.

Did you make any enhancements to your quantitative models during the Reporting Period?

We continuously look for ways to improve our investment process. During the first half of the Reporting Period, we introduced several new signals into our models. For example, we introduced new signals within our Sentiment Analysis investment theme, which were rolled out across the majority of regions, including the U.S., emerging markets, Japan and Europe. These signals are an extension to our existing suite of signals that focus on institutional positioning and capture sentiment associated with outstanding short-interest for specific names. The new signals focus on short positions by institutional investors and seek to identify which ones may have been covered prematurely or maintained beyond their optimal duration. Additionally, within our High Quality Business Models investment theme, we introduced another signal to our existing suite of alternative growth signals, also across multiple regions, including the U.S., emerging markets, Japan and Europe. This signal seeks to identify companies that exhibit elevated levels of demand for their products and services based on trends identified from consumer Internet activity data. While we believe these types of trends can help provide additional insight on the global demand for certain products and services, we have also closely focused on developing our own process to identify which individual companies are most highly exposed to specific trends. Lastly, we introduced, in the U.S., a proprietary methodology to enhance how we identify a company's relevant peer group, as we believe that more common methods relying on country or industry classifications may be overly simplistic for companies operating in a complex business environment. This methodology is used to enhance our relative valuation signals within our Fundamental Mispricings investment theme that seek to identify companies that are currently trading at attractive valuations relative to their most relevant peers.

During the second half of the Reporting Period, we introduced several new signals into our models, mostly in the fourth quarter of 2021. For example, we introduced a new signal in the U.S. within our High Quality Business Models investment theme. The signal focused on the number of job postings by a company as we believe companies that are looking to expand their workforce are better positioned for growth in the long term. Additionally, we introduced two new signals within our Market Themes & Trends investment theme. The first signal, rolled out in the U.S. region, helps expand our library of economic linkages signals by identifying relationships between companies posting similar jobs in the same geographical regions. The second signal, rolled out across all regions, focuses on macro market environments and assesses similarities between market events from the past and the current environment. The signal evaluates the historical performance of the stock in similar market conditions to predict future stock returns. Finally, we introduced a signal within our Sentiment Analysis investment theme. Rolled out across all developed market regions, it uses short sales transaction data to help identify potential sustained stock selloffs, expanding upon our existing factors that leverage short sales and short interest data.

What was the Fund's sector positioning relative to its benchmark index at the end of the Reporting Period?

As of December 31, 2021, the Fund was overweight the financials, health care, consumer discretionary and communication services sectors relative to the Russell Index. The Fund was underweight utilities, real estate, industrials and consumer staples and was rather neutrally weighted in information technology, materials and energy compared to the Russell Index on the same date.

Were there any changes to the Fund's portfolio management team during the Reporting Period?

In early 2021, Takashi Suwabe, Managing Director and Senior Portfolio Manager, became a co-portfolio manager for the Fund. Mr. Suwabe joined Len Ioffe, Managing Director and Senior Portfolio Manager, Osman Ali, Managing Director and Senior Portfolio Manager, and Dennis Walsh, Managing Director and Senior Portfolio Manager, who have managed the Fund since 2011, 2012, and 2013 respectively. By design, all investment decisions for the Fund are performed within a co-lead or team structure.

What is your strategy going forward for the Fund?

Looking ahead, we continue to believe that less expensive stocks should outpace more expensive stocks, and stocks with good momentum are likely to outperform those with poor momentum. We intend to maintain our focus on seeking companies about which fundamental research analysts are becoming more positive as well as profitable companies with sustainable earnings and a track record of using their capital to enhance shareholder value. As such, we anticipate remaining fully invested with long-term performance likely to be the result of stock selection rather than sector or capitalization allocations.

We stand behind our investment philosophy that sound economic investment principles, coupled with a disciplined quantitative approach, can provide strong, uncorrelated returns over the long term. Our research agenda is robust, and we continue to enhance our existing models, add new proprietary forecasting signals and improve our trading execution as we seek to provide the most value to our shareholders.

Institutional	23.79%	11.33%	12.92%
Service	23.50%	11.06%	12.65%

INVESTMENT OBJECTIVE

The Fund seeks long-term growth of capital.

Portfolio Management Discussion and Analysis

Below, the Goldman Sachs Fundamental Equity U.S. Equity Portfolio Management Team discusses the Goldman Sachs Variable Insurance Trust — Goldman Sachs Strategic Growth Fund's (the "Fund") performance and positioning for the 12-month period ended December 31, 2021 (the "Reporting Period").

How did the Fund perform during the Reporting Period?

During the Reporting Period, the Fund's Institutional and Service Shares generated average annual total returns of 21.93% and 21.56%, respectively. These returns compare to the 27.60% average annual total return of the Fund's benchmark, the Russell 1000[®] Growth Index (with dividends reinvested) (the "Russell Index"), during the same time period.

What key factors were responsible for the Fund's performance during the Reporting Period?

The Fund generated double-digit absolute gains but underperformed the Russell Index on a relative basis during the Reporting Period. Stock selection overall detracted most from the Fund's relative results. Sector allocation as a whole also detracted, albeit modestly.

Which equity market sectors most significantly affected Fund performance?

Detracting most from the Fund's relative results during the Reporting Period was weak stock selection in the information technology, consumer discretionary and health care sectors. Partially offsetting these detractors was effective stock selection in the communication services, industrials and financials sectors, which contributed positively to relative results during the Reporting Period.

Which stocks detracted significantly from the Fund's performance during the Reporting Period?

Detracting from the Fund's results relative to the Russell Index were overweight positions in C3.ai and Splunk and an underweight position in Microsoft.

C3.ai provides enterprise artificial intelligence software for digital transformation. In early March 2021, its shares depreciated following a mixed earnings report with below consensus revenues and margins along with lower than consensus billings results. As the year progressed, we no longer saw our investment thesis playing out, and we ultimately decided to exit the position in September 2021 in favor of other investment opportunities.

Splunk engages in the development and marketing of software solutions. During the first quarter of 2021, its shares declined in line with the broad information technology sector and then further depreciated following the news of the departures of several senior company leaders. Later in the year, Splunk's Chief Executive Officer announced his retirement as well. Though headwinds remained, at the end of the Reporting Period, we were still confident in Splunk's prospects given its transition to a subscription-based pricing model, its near-term upsell opportunity with its existing renewal base, and what we saw as its relatively inexpensive valuation.

Microsoft engages in the development and support of software, services, devices and solutions. While its stock had a robust return during the Reporting Period, the Fund's underweight positioning in the name caused it to be a major detractor from relative results. Microsoft's performance can be attributed to an acceleration in its Azure business, ongoing strength in its Office and Windows products, and improved demand for on-premise products with customers continuing to make investments in their cloud environments. At the end of the Reporting Period, we continued to like the direction of the business moving forward and intended to carefully monitor both the stock's valuation and the Fund's positioning in the stock.

What were some of the Fund's best-performing individual stocks?

Among those stocks the Fund benefited most from relative to the Russell Index were overweight positions in graphics processors, chipsets and multimedia software manufacturer NVIDIA, data infrastructure semiconductor solutions provider Marvell Technology and Google parent company Alphabet (Class A).

Following its announcement of 2021 first quarter earnings, NVIDIA's stock saw a substantial downturn due to concerns around margin expansion and data center revenue growth. However, the stock quickly rebounded through the rest of the Reporting Period, as the company beat consensus estimates and proved it could out-innovate its competitors. At the end of the Reporting Period, we believed NVIDIA was well positioned to continue to benefit from the strong secular growth themes of migration to the cloud and online entertainment along with ongoing strong performance versus its competitors.

Marvell Technology's stock price appreciated along with an earnings report during the second quarter of 2021 that was better than consensus expectations. Then, in early December 2021, the company delivered another strong quarter of performance, highlighted by its ability to better fulfill backlogged orders. Additionally, the backlog of business actually increased, signifying the further demand for Marvell Technology's products. At the end of the Reporting Period, we remained positive on Marvell Technology given our view of its management's history of execution and the company's exposure to structural growth trends in cloud, autos and fifth-generation ("5G") technologies.

Alphabet is a holding company that engages in advertising, digital content, applications, cloud offerings and more through its subsidiaries, including its largest, Google. During the Reporting Period, the company benefited from a solid recovery in the search business as well as from significant growth in its YouTube and Cloud businesses. It had become clear to many that the broad advertising market was recovering, and virtually all of the major Internet players were benefiting — all while Alphabet continued to show real cost discipline, in our view. At the end of the Reporting Period, we remained optimistic about Alphabet, as advertising spending and travel were improving, which we believe could further benefit the company.

How did the Fund use derivatives and similar instruments during the Reporting Period?

During the Reporting Period, we did not use derivatives as part of an active management strategy.

Did the Fund make any significant purchases or sales during the Reporting Period?

We initiated a position in logistics and package delivery company United Parcel Services ("UPS") during the Reporting Period. We believe the automation and capacity efforts of UPS are starting to yield benefits through improved margins. In addition, pricing has been strong broadly, as UPS has implemented surcharges as a result of high volumes.

We established a Fund position in cloud-based software solutions provider Bill.com Holdings during the Reporting Period. The secular theme of back office automation and efficiency improvement is growing in importance, in our view, and we believe the business is able to simplify and automate complex back office financial operations.

Conversely, in addition to the sale of C3.ai, we exited the Fund's position in digital telecommunications company Qualcomm during the Reporting Period. We sold the position in April 2021 after numerous business risks were identified along with decreased business momentum being demonstrated through increased competition and what we saw as a valuation peak.

We eliminated the Fund's position in Fidelity National Information Services, which provides technology solutions for merchants, banks and capital markets firms worldwide, during the Reporting Period. We believe its near-term growth could be inhibited by implied risks in its merchant solutions business. We also sold the position due to concerns about its long-term growth based on the disruptive competitive landscape.

Were there any notable changes in the Fund's weightings during the Reporting Period?

In constructing the Fund's portfolio, we focus on picking stocks rather than on making industry or sector bets. We seek to outpace the benchmark index by overweighting stocks that we expect to outperform and underweighting those that we think may lag. Consequently, changes in its sector weights are generally the direct result of individual stock selection or of stock appreciation or depreciation. That said, during the Reporting Period, the Fund's exposure to communication services, health care and industrials increased compared to the Russell Index. The Fund's allocations compared to the Russell Index in consumer discretionary and information technology decreased.

How was the Fund positioned relative to its benchmark index at the end of the Reporting Period?

At the end of December 2021, the Fund had overweighted positions relative to the Russell Index in the communication services, health care and materials sectors. On the same date, the Fund had underweighted positions compared to the Russell Index in information technology and consumer discretionary and was rather neutrally weighted to the Russell Index in consumer staples, financials, industrials and real estate. The Fund had no exposure to the utilities and energy sectors at the end of the Reporting Period.

Were there any changes to the Fund's portfolio management team during the Reporting Period?

There were no changes to the Fund's portfolio management team during the Reporting Period.

What is the Fund's tactical view and strategy for the months ahead?

The end of 2021 was cast with the development of the Omicron variant of COVID-19, which we expected at the end of the Reporting Period to remain a major focus of the U.S. equity markets in the first quarter of 2022, as entities around the world continued to navigate pockets of outbreaks and implement responses accordingly. Other major themes, such as the acceleration in the Fed's winding down of its asset purchasing program and hiking of interest rates as well as inflation readings, supply-chain issues and the global energy shortage may test the markets again. The unclear future of the U.S. Administration's social spending bill will likely also be in play in early 2022.

Regardless of market direction, we intend to stay true to our quality-first investment approach and seek to invest in businesses with healthy balance sheets, relatively stable cash flows and differentiated business models aligned to secular tailwinds. We continue to test our models and re-evaluate our assumptions with increasing information, remain focused on the long-term investment horizon and believe this fundamental approach can generate added value in the long run. As always, we maintain our focus on seeking companies that we believe will generate long-term growth in today's ever-changing market conditions.

FUND vs. BENCHMARK SECTOR ALLOCATIONS²

As of December 31, 2021

² The Fund is actively managed and, as such, its composition may differ over time. Consequently, the Fund’s overall sector allocations may differ from percentages contained in the graph above. The graph categorizes investments using Global Industry Classification Standard (“GICS”); however, the sector classifications used by the portfolio management team may differ from GICS. The percentage shown for each investment category reflects the value of investments in that category as a percentage of market value (excluding investments in the securities lending reinvestment vehicle, if any). Underlying sector allocations of exchange traded funds and investment companies held by the Fund are not reflected in the graph above. Investments in the securities lending reinvestment vehicle represented 0.2% of the Fund’s net assets at December 31, 2021.

For more information about your Fund, please refer to www.GSAMFUNDS.com. There, you can learn more about your Fund’s investment strategies, holdings, and performance.

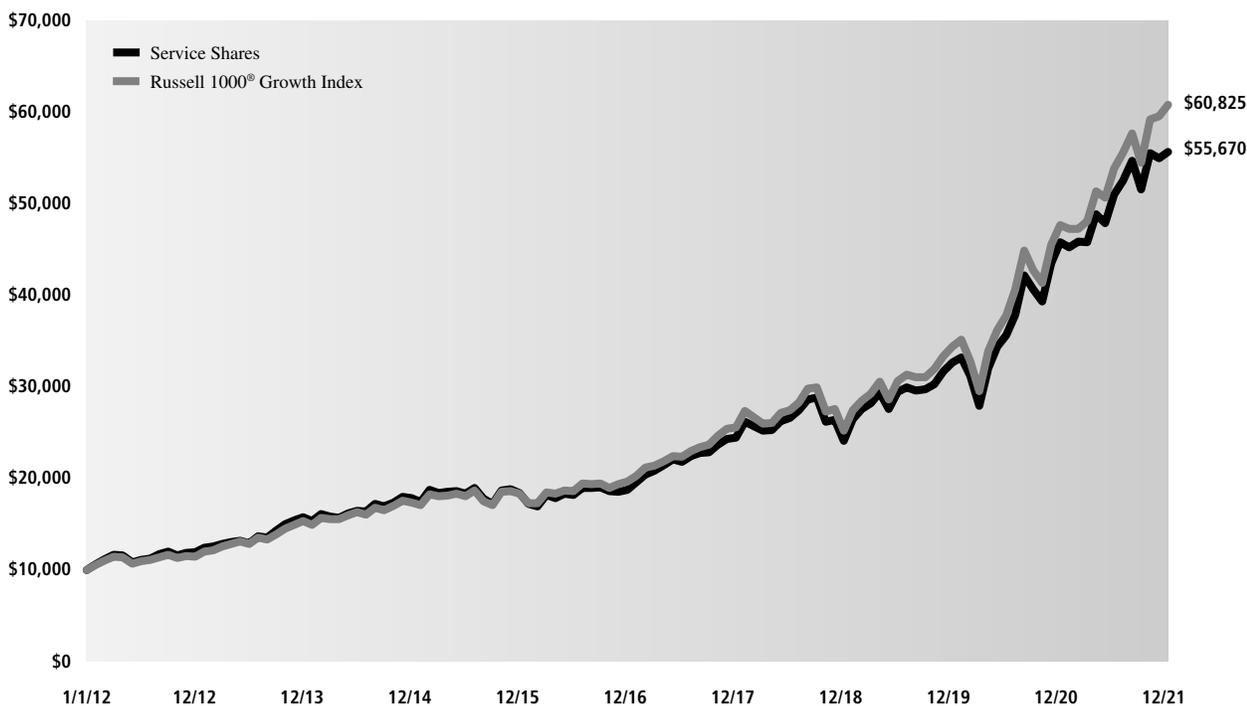

Performance Summary

December 31, 2021

The following graph shows the value, as of December 31, 2021, of a \$10,000 investment made on January 1, 2012 in Service Shares at NAV. For comparative purposes, the performance of the Fund’s benchmark, the Russell 1000® Growth Index (with distributions reinvested), is shown. Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown and in their absence, performance would be reduced. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. The returns set forth below represent past performance. Past performance does not guarantee future results. The Fund’s investment return and principal value will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted below. Please visit our web site at www.GSAMFUNDS.com to obtain the most recent month-end returns.

Strategic Growths Fund’s 10 Year Performance

Performance of a \$10,000 investment, with distributions reinvested, from January 1, 2012 through December 31, 2021.

Average Annual Total Return through December 31, 2021

	One Year	Five Years	Ten Years
Institutional	21.93%	24.58%	19.02%
Service	21.56%	24.26%	18.71%

INVESTMENT OBJECTIVE

The Fund seeks long-term growth of capital and dividend income.

Portfolio Management Discussion and Analysis

Below, the Goldman Sachs Quantitative Investment Strategies Team discusses the Goldman Sachs Variable Insurance Trust—Goldman Sachs U.S. Equity Insights Fund’s (the “Fund”) performance and positioning for the 12-month period ended December 31, 2021 (the “Reporting Period”).

How did the Fund perform during the Reporting Period?

During the Reporting Period, the Fund’s Institutional and Service Shares generated average annual total returns of 29.41% and 29.11%, respectively. These returns compare to the 28.71% average annual total return of the Fund’s benchmark, the Standard & Poor’s 500® Index (with dividends reinvested) (the “S&P 500® Index”) during the same time period.

What key factors were responsible for the Fund’s performance during the Reporting Period?

The Fund uses a quantitative style of management, in combination with a qualitative overlay, that emphasizes fundamentally-based stock selection, careful portfolio construction and efficient implementation. The Fund’s investments are selected using fundamental research and a variety of quantitative techniques based on certain investment themes, namely Fundamental Mispricings, High Quality Business Models, Sentiment Analysis and Market Themes & Trends.

During the Reporting Period, the Fund outperformed the S&P 500® Index, with two of our quantitative model’s four investment themes contributing positively to results. Stock selection overall, driven by these investment themes, bolstered relative performance.

What impact did the Fund’s investment themes have on performance during the Reporting Period?

In keeping with our investment approach, we use our quantitative model and four investment themes to take a long-term view of market patterns and look for inefficiencies, selecting stocks for the Fund and overweighting or underweighting the ones chosen by the model. Over time and by design, the performance of any one of the model’s investment themes tends to have a low correlation with the model’s other themes, demonstrating the diversification benefit of the Fund’s theme-driven quantitative model. The variance in performance supports our research indicating that the diversification provided by the Fund’s different investment themes is a significant investment advantage over the long term, even though the Fund may experience underperformance in the short term. Of course, diversification does not protect an investor from market risk nor does it ensure a profit.

During the Reporting Period, two of our investment themes — Sentiment Analysis and High Quality Business Models — contributed positively to the Fund’s relative performance. Sentiment Analysis seeks to identify stocks experiencing improvements in their overall market sentiment. High Quality Business Models seeks to identify companies that are generating high quality revenues with sustainable business models and aligned management incentives.

Market Themes & Trends and Fundamental Mispricings detracted from the Fund’s relative performance during the Reporting Period. Market Themes & Trends seeks to identify companies positively positioned to benefit from themes and trends in the market and macroeconomic environment. Fundamental Mispricing seeks to identify high quality businesses trading at a fair price, which we believe may lead to strong performance over the long run.

How did the Fund’s sector and industry allocations affect relative performance?

In constructing the Fund’s portfolio, our quantitative model focuses on stock selection rather than making sector or industry bets. Consequently, the Fund is similar to its benchmark, the S&P 500® Index, in terms of its sector and industry allocations and style. Relative performance is primarily driven by stock selection, not by sector or industry allocations.

Did stock selection help or hurt Fund performance during the Reporting Period?

We seek to outpace the S&P 500® Index by overweighting stocks that we expect to outperform and underweighting those that we think may lag. At the same time, we strive to maintain a risk profile similar to the S&P 500® Index. The Fund’s investments are selected using fundamental research and a variety of quantitative techniques based on our investment themes. For example, the Fund aims to hold a basket of stocks with better Fundamental Mispricing characteristics than the benchmark index.

During the Reporting Period, stock selection added to the Fund's performance, with investments in the health care, real estate and industrials sectors contributing most positively to results relative to the S&P 500[®] Index. Stock selection in the information technology, energy and materials sectors detracted most from the Fund's results relative to the S&P 500[®] Index during the Reporting Period.

Which individual stock positions contributed the most to the Fund's relative returns during the Reporting Period?

The Fund benefited most from overweight positions in auto manufacturer Ford Motor, network security solutions provider Palo Alto Networks and Google parent company Alphabet. The overweight in Ford Motor was established primarily because of our Fundamental Mispricings and High Quality Business Models investment themes. The Fund was overweight Palo Alto Networks due mostly to our Sentiment Analysis and Market Themes & Trends investment themes. The Fund's overweight in Alphabet was driven mainly by our Fundamental Mispricings investment theme.

Which individual positions detracted from the Fund's results during the Reporting Period?

Detracting most from the Fund's results relative to the S&P 500[®] Index was an underweight position in NVIDIA, which engages in the design and manufacture of computer graphics processors, chipsets and related multimedia software. Overweight positions in electronic signature solutions provider DocuSign and digital and mobile payments technology platform PayPal Holdings also hurt. The Fund had an underweight position in NVIDIA driven primarily by our Market Themes & Trends investment theme. The Fund's overweight in DocuSign was largely due to our High Quality Business Models investment theme. The overweight in PayPal Holdings was established primarily because of our Sentiment Analysis investment theme.

How did the Fund use derivatives during the Reporting Period?

During the Reporting Period, we did not use derivatives as part of an active management strategy to add value to the Fund's results.

Did you make any enhancements to your quantitative models during the Reporting Period?

We continuously look for ways to improve our investment process. During the first half of the Reporting Period, we introduced several new signals into our models. For example, we introduced new signals within our Sentiment Analysis investment theme, which were rolled out across the majority of regions, including the U.S., emerging markets, Japan and Europe. These signals are an extension to our existing suite of signals that focus on institutional positioning and capture sentiment associated with outstanding short-interest for specific names. The new signals focus on short positions by institutional investors and seek to identify which ones may have been covered prematurely or maintained beyond their optimal duration. Additionally, within our High Quality Business Models investment theme, we introduced another signal to our existing suite of alternative growth signals, also across multiple regions, including the U.S., emerging markets, Japan and Europe. This signal seeks to identify companies that exhibit elevated levels of demand for their products and services based on trends identified from consumer Internet activity data. While we believe these types of trends can help provide additional insight on the global demand for certain products and services, we have also closely focused on developing our own process to identify which individual companies are most highly exposed to specific trends. Lastly, we introduced, in the U.S., a proprietary methodology to enhance how we identify a company's relevant peer group, as we believe that more common methods relying on country or industry classifications may be overly simplistic for companies operating in a complex business environment. This methodology is used to enhance our relative valuation signals within our Fundamental Mispricings investment theme that seek to identify companies that are currently trading at attractive valuations relative to their most relevant peers.

During the second half of the Reporting Period, we introduced several new signals into our models, mostly in the fourth quarter of 2021. For example, we introduced a new signal in the U.S. within our High Quality Business Models investment theme. The signal focused on the number of job postings by a company as we believe companies that are looking to expand their workforce are better positioned for growth in the long term. Additionally, we introduced two new signals within our Market Themes & Trends investment theme. The first signal, rolled out in the U.S. region, helps expand our library of economic linkages signals by identifying relationships between companies posting similar jobs in the same geographical regions. The second signal, rolled out across all regions, focuses on macro market environments and assesses similarities between market events from the past and the current environment. The signal evaluates the historical performance of the stock in similar market conditions to predict future stock returns. Finally, we introduced a signal within our Sentiment Analysis investment theme. Rolled out across all developed market regions, it uses short sales transaction data to help identify potential sustained stock selloffs, expanding upon our existing factors that leverage short sales and short interest data.

What was the Fund's sector positioning relative to its benchmark index at the end of the Reporting Period?

As of December 31, 2021, the Fund was overweight the information technology, health care, materials and real estate sectors relative to the S&P 500[®] Index. The Fund was underweight consumer staples, energy and financials and was rather neutrally weighted in communication services, consumer discretionary, utilities and industrials compared to the benchmark index on the same date.

Were there any changes to the Fund's portfolio management team during the Reporting Period?

In early 2021, Takashi Suwabe, Managing Director and Senior Portfolio Manager, became a co-portfolio manager for the Fund. Mr. Suwabe joined Len Ioffe, Managing Director and Senior Portfolio Manager, Osman Ali, Managing Director and Senior Portfolio Manager, and Dennis Walsh, Managing Director and Senior Portfolio Manager, who have managed the Fund since 2011, 2012, and 2013 respectively. By design, all investment decisions for the Fund are performed within a co-lead or team structure.

What is your strategy going forward for the Fund?

Looking ahead, we continue to believe that less expensive stocks should outpace more expensive stocks, and stocks with good momentum are likely to outperform those with poor momentum. We intend to maintain our focus on seeking companies about which fundamental research analysts are becoming more positive as well as profitable companies with sustainable earnings and a track record of using their capital to enhance shareholder value. As such, we anticipate remaining fully invested with long-term performance likely to be the result of stock selection rather than sector or capitalization allocations.

We stand behind our investment philosophy that sound economic investment principles, coupled with a disciplined quantitative approach, can provide strong, uncorrelated returns over the long term. Our research agenda is robust, and we continue to enhance our existing models, add new proprietary forecasting signals and improve our trading execution as we seek to provide the most value to our shareholders.

Performance Summary

December 31, 2021

The following graph shows the value, as of December 31, 2021, of a \$10,000 investment made on January 1, 2012 in the Service Shares at NAV. For comparative purposes, the performance of the Fund’s benchmark, the S&P 500® Index, is shown. Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown and in their absence, performance would be reduced. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. The returns set forth below represent past performance. Past performance does not guarantee future results. The Fund’s investment return and principal value will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted below. Please visit our web site at www.GSAMFUNDS.com to obtain the most recent month-end returns.

U.S. Equity Insights Fund’s 10 Year Performance

Performance of a \$10,000 investment, with distributions reinvested, from January 1, 2012 through December 31, 2021.

Average Annual Total Return through December 31, 2021	One Year	Five Years	Ten Years
Institutional	29.41%	17.25%	16.18%
Service	29.11%	17.00%	15.94%

Index Definitions

S&P 500® Index is the Standard & Poor's composite index of 500 stocks, an unmanaged index of common stock prices. The figures for the index do not include any deduction for fees, expenses or taxes.

Russell 2000® Index is an unmanaged index of common stock prices that measures the performance of the 2000 smallest companies in the Russell 3000® Index. The figures for the index do not include any deduction for fees, expenses or taxes.

Russell Midcap® Index measures the performance of the 800 smallest companies in the Russell 1000® Index, which represents approximately 25% of the total market capitalization of the Russell 1000® Index.

Russell 1000® Index measures the performance of the 1,000 largest companies in the Russell 3000® Index, which represents approximately 92% of the total market capitalization of the Russell 3000® Index.

The **Russell 1000® Value Index** is an unmanaged market capitalization weighted index of the 1000 largest U.S. companies with lower price-to-book ratios and lower forecasted growth values. The figures for the index do not include any deduction for fees, expenses or taxes.

Russell Midcap® Growth Index is an unmanaged index that measures the performance of those companies in the Russell Midcap® Index with higher price-to-book ratios and higher forecasted growth values.

The **Russell Midcap Value® Index** is an unmanaged index of common stock prices that measures the performance of those Russell Midcap companies with lower price-to-book ratios and lower forecasted growth values. The index figures do not reflect any deduction for fees, expenses or taxes

The **Russell 1000® Growth Index** is an unmanaged market capitalization weighted index of the 1000 largest U.S. companies with higher price-to-book ratios and higher forecasted growth values. The figures for the index do not include any deduction for fees, expenses or taxes.

Portfolio turnover rate ^(c)	4%	4%	3%	4%	2%

(a) Calculated based on the average shares outstanding methodology.

(b) Assumes investment at the NAV at the beginning of the year, reinvestment of all dividends and distributions, a complete redemption of the investment at the NAV at the end of the year and no sales or redemption charges (if any). Total returns would be reduced if a sales or redemption charge was taken into account. Returns do not reflect the impact of taxes to shareholders relating to Fund distributions or the redemption of Fund shares.

(c) The Fund's portfolio turnover rate is calculated in accordance with regulatory requirements, without regard to transactions involving short term investments. If such transactions were included, the Fund's portfolio turnover rate may be higher.

Portfolio turnover rate ^(c)	54%	58%	58%	125%	127%

(a) Calculated based on the average shares outstanding methodology.

(b) Assumes investment at the NAV at the beginning of the year, reinvestment of all dividends and distributions, a complete redemption of the investment at the NAV at the end of the year and no sales or redemption charges (if any). Total returns would be reduced if a sales or redemption charge was taken into account. Returns do not reflect the impact of taxes to shareholders relating to Fund distributions or the redemption of Fund shares.

(c) The Fund's portfolio turnover rate is calculated in accordance with regulatory requirements, without regard to transactions involving short term investments. If such transactions were included, the Fund's portfolio turnover rate may be higher.

Notes to Financial Statements

December 31, 2021

1. ORGANIZATION

Goldman Sachs Variable Insurance Trust (the “Trust” or “VIT”) is a Delaware statutory trust registered under the Investment Company Act of 1940, as amended (the “Act”), as an open-end management investment company. The following table lists those series of the Trust that are included in this report (collectively, the “Funds” or individually a “Fund”), along with their corresponding share classes and respective diversification status under the Act:

Fund	Share Classes Offered	Diversified/ Non-diversified
Equity Index	Service	Diversified
Growth Opportunities	Institutional and Service	Diversified
International Equity Insights	Institutional and Service	Diversified
Large Cap Value	Institutional and Service	Diversified
Mid Cap Value	Institutional and Service	Diversified
Small Cap Equity Insights	Institutional and Service	Diversified
Strategic Growth	Institutional and Service	Non-Diversified
U.S. Equity Insights	Institutional and Service	Diversified

Shares of the Trust are offered to separate accounts of participating life insurance companies for the purpose of funding variable annuity contracts and variable life insurance policies.

Goldman Sachs Asset Management, L.P. (“GSAM” or the “Investment Adviser”), an affiliate of Goldman Sachs & Co. LLC (“Goldman Sachs”), serves as investment adviser to the Funds pursuant to management agreements (the “Agreements”) with the Trust.

2. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) and require management to make estimates and assumptions that may affect the reported amounts and disclosures. Actual results may differ from those estimates and assumptions. Each Fund is an investment company under GAAP and follows the accounting and reporting guidance applicable to investment companies.

A. Investment Valuation — The Fund’s valuation policy is to value investments at fair value.

B. Investment Income and Investments — Investment income includes interest income, dividend income, and securities lending income, if any. Interest income is accrued daily and adjusted for amortization of premiums and accretion of discounts. Dividend income is recognized on ex-dividend date or, for certain foreign securities, as soon as such information is obtained subsequent to the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received. Investment transactions are reflected on trade date. Realized gains and losses are calculated using identified cost. Investment transactions are recorded on the following business day for daily net asset value (“NAV”) calculations. Investment income is recorded net of any foreign withholding taxes, less any amounts reclaimable. The Funds may file withholding tax reclaims in certain jurisdictions to recover a portion of amounts previously withheld. Any foreign capital gains tax is accrued daily based upon net unrealized gains, and is payable upon sale of such investments. Distributions received from the Funds’ investments in United States (“U.S.”) real estate investment trusts (“REITs”) may be characterized as ordinary income, net capital gain and/or a return of capital. A return of capital is recorded by the Funds as a reduction to the cost basis of the REIT.

For derivative contracts, realized gains and losses are recorded upon settlement of the contract.

C. Class Allocations and Expenses — Investment income, realized and unrealized gain (loss), if any, and non-class specific expenses of each Fund are allocated daily based upon the proportion of net assets of each class. Non-class specific expenses

Notes to Financial Statements (continued)

December 31, 2021

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

directly incurred by a Fund are charged to that Fund, while such expenses incurred by the Trust are allocated across the applicable Funds on a straight-line and/or pro-rata basis depending upon the nature of the expenses. Class specific expenses, where applicable, are borne by the respective share classes and include Distribution and Service and Transfer Agency fees.

D. Federal Taxes and Distributions to Shareholders — It is each Fund's policy to comply with the requirements of the Internal Revenue Code of 1986, as amended (the "Code"), applicable to regulated investment companies and to distribute each year substantially all of its investment company taxable income and capital gains to its shareholders. Accordingly, each Fund is not required to make any provisions for the payment of federal income tax. Distributions to shareholders are recorded on the ex-dividend date. Income and capital gains distributions, if any, are declared and paid at least annually.

Net capital losses, if any, are carried forward to future fiscal years and may be used to the extent allowed by the Code to offset any future capital gains. Losses that are carried forward will retain their character as either short-term or long-term capital losses. Utilization of capital loss carryforwards will reduce the requirement of future capital gains distributions.

The characterization of distributions to shareholders for financial reporting purposes is determined in accordance with federal income tax rules, which may differ from GAAP. The source of each Fund's distributions may be shown in the accompanying financial statements as either from distributable earnings or capital. Certain components of the Funds' net assets on the Statements of Assets and Liabilities reflect permanent GAAP/tax differences based on the appropriate tax character.

E. Foreign Currency Translation — The accounting records and reporting currency of a Fund are maintained in U.S. dollars. Assets and liabilities denominated in foreign currencies are translated into U.S. dollars using the current exchange rates at the close of each business day. The effect of changes in foreign currency exchange rates on investments is included within net realized and unrealized gain (loss) on investments. Changes in the value of other assets and liabilities as a result of fluctuations in foreign exchange rates are included in the Statements of Operations within net change in unrealized gain (loss) on foreign currency translation. Transactions denominated in foreign currencies are translated into U.S. dollars on the date the transaction occurred, the effects of which are included within net realized gain (loss) on foreign currency transactions.

3. INVESTMENTS AND FAIR VALUE MEASUREMENTS

U.S. GAAP defines the fair value of a financial instrument as the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price); the Funds' policy is to use the market approach. GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The level in the fair value hierarchy within which the fair value measurement in its entirety falls shall be determined based on the lowest level input that is significant to the fair value measurement in its entirety. The levels used for classifying investments are not necessarily an indication of the risk associated with investing in these investments. The three levels of the fair value hierarchy are described below:

Level 1 — Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 — Quoted prices in markets that are not active or financial instruments for which significant inputs are observable (including, but not limited to, quoted prices for similar investments, interest rates, foreign exchange rates, volatility and credit spreads), either directly or indirectly;

Level 3 — Prices or valuations that require significant unobservable inputs (including GSAM's assumptions in determining fair value measurement).

The Board of Trustees ("Trustees") has approved Valuation Procedures that govern the valuation of the portfolio investments held by the Funds, including investments for which market quotations are not readily available. The Trustees have delegated to GSAM day-to-day responsibility for implementing and maintaining internal controls and procedures related to the valuation of the Funds' investments. To assess the continuing appropriateness of pricing sources and methodologies, GSAM regularly performs price

3. INVESTMENTS AND FAIR VALUE MEASUREMENTS (continued)

verification procedures and issues challenges as necessary to third party pricing vendors or brokers, and any differences are reviewed in accordance with the Valuation Procedures.

A. Level 1 and Level 2 Fair Value Investments — The valuation techniques and significant inputs used in determining the fair values for investments classified as Level 1 and Level 2 are as follows:

Equity Securities — Equity securities traded on a U.S. securities exchange or the NASDAQ system, or those located on certain foreign exchanges, including but not limited to the Americas, are valued daily at their last sale price or official closing price on the principal exchange or system on which they are traded. If there is no sale or official closing price or such price is believed by GSAM to not represent fair value, equity securities will be valued at the valid closing bid price for long positions and at the valid closing ask price for short positions (i.e. where there is sufficient volume, during normal exchange trading hours). If no valid bid/ask price is available, the equity security will be valued pursuant to the Valuation Procedures approved by the Trustees and consistent with applicable regulatory guidance. To the extent these investments are actively traded, they are classified as Level 1 of the fair value hierarchy, otherwise they are generally classified as Level 2. Certain equity securities containing unique attributes may be classified as Level 2.

Unlisted equity securities for which market quotations are available are valued at the last sale price on the valuation date, or if no sale occurs, at the last bid price for long positions or the last ask price for short positions, and are generally classified as Level 2. Securities traded on certain foreign securities exchanges are valued daily at fair value determined by an independent fair value service (if available) under Fair Valuation Procedures approved by the Trustees and consistent with applicable regulatory guidance. The independent fair value service takes into account multiple factors including, but not limited to, movements in the securities markets, certain depositary receipts, futures contracts and foreign currency exchange rates that have occurred subsequent to the close of the foreign securities exchange. These investments are generally classified as Level 2 of the fair value hierarchy.

Money Market Funds — Investments in the Goldman Sachs Financial Square Government Fund (“Underlying Fund”) are valued at the NAV per share of the Institutional Share class on the day of valuation. These investments are generally classified as Level 1 of the fair value hierarchy. For information regarding the Underlying Fund’s accounting policies and investment holdings, please see the Underlying Fund’s shareholder report.

Derivative Contracts — A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. A Fund enters into derivative transactions to hedge against changes in interest rates, securities prices, and/or currency exchange rates, to increase total return, or to gain access to certain markets or attain exposure to other underliers. For financial reporting purposes, cash collateral that has been pledged to cover obligations of a Fund and cash collateral received, if any, is reported separately on the Statements of Assets and Liabilities as receivables/payables for collateral on certain derivatives contracts. Non-cash collateral pledged by a Fund, if any, is noted in the Schedules of Investments.

Exchange-traded derivatives, including futures and options contracts, are generally valued at the last sale or settlement price on the exchange where they are principally traded. Exchange-traded options without settlement prices are generally valued at the midpoint of the bid and ask prices on the exchange where they are principally traded (or, in the absence of two-way trading, at the last bid price for long positions and the last ask price for short positions). Exchange-traded derivatives typically fall within Level 1 of the fair value hierarchy. Over-the-counter (“OTC”) and centrally cleared derivatives are valued using market transactions and other market evidence, including market-based inputs to models, calibration to market-clearing transactions, broker or dealer quotations, or other alternative pricing sources. Where models are used, the selection of a particular model to value OTC and centrally cleared derivatives depends upon the contractual terms of, and specific risks inherent in, the instrument, as well as the availability of pricing information in the market. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit curves, measures of volatility, voluntary and involuntary prepayment rates, loss severity rates and correlations of such inputs. For OTC and centrally cleared derivatives that trade in liquid markets, model inputs can generally be verified and model selection does not involve significant management judgment. OTC and centrally cleared derivatives are classified within Level 2 of the fair value hierarchy when significant inputs are corroborated by market evidence.

Notes to Financial Statements (continued)

December 31, 2021

3. INVESTMENTS AND FAIR VALUE MEASUREMENTS (continued)

i. **Futures Contracts** — Futures contracts are contracts to buy or sell a standardized quantity of a specified commodity or security. Upon entering into a futures contract, a Fund deposits cash or securities in an account on behalf of the broker in an amount sufficient to meet the initial margin requirement. Subsequent payments are made or received by a Fund equal to the daily change in the contract value and are recorded as variation margin receivable or payable with a corresponding offset to unrealized gains or losses.

B. Level 3 Fair Value Investments — To the extent that significant inputs to valuation models and other alternative pricing sources are unobservable, or if quotations are not readily available, or if GSAM believes that such quotations do not accurately reflect fair value, the fair value of a Fund's investments may be determined under Valuation Procedures approved by the Trustees. GSAM, consistent with its procedures and applicable regulatory guidance, may make an adjustment to the most recent valuation prices of either domestic or foreign securities in light of significant events to reflect what it believes to be the fair value of the securities at the time of determining a Fund's NAV. To the extent investments are valued using single source broker quotations obtained directly from the broker or passed through from third party pricing vendors, such investments are classified as Level 3 investments.

C. Fair Value Hierarchy — The following is a summary of the Funds' investments and derivatives classified in the fair value hierarchy as of December 31, 2021:

EQUITY INDEX FUND

(a) Amounts are disclosed by continent to highlight the impact of time zone differences between local market close and the calculation of NAV. Security valuations are based on the principal exchange or system on which they are traded, which may differ from country of domicile noted in table. The Fund utilizes fair value model prices provided by an independent third-party (fair value) service for certain international equity securities resulting in a Level 2 classification.

(b) Amount shown represents unrealized gain at fiscal year end.

For further information regarding security characteristics, see the Schedules of Investments.

4. INVESTMENTS IN DERIVATIVES

The following table sets forth, by certain risk types, the gross value of derivative contracts (not considered to be hedging instruments for accounting disclosure purposes) as of December 31, 2021. These instruments were used as part of the Funds' investment strategies and to obtain and/or manage exposure related to the risks below. The values in the tables below exclude the effects of cash collateral received or posted pursuant to these derivative contracts, and therefore are not representative of the Funds' net exposure.

Fund	Risk	Statements of Assets and Liabilities	Assets ^(a)	Statements of Assets and Liabilities	Liabilities ^(a)
Equity Index	Equity	Variation margin on futures contracts	\$13,903	—	\$—
International Equity Insights	Equity	Variation margin on futures contracts	2,788	—	—
Small Cap Equity Insights	Equity	Variation margin on futures contracts	10,175	—	—

(a) Includes unrealized gain (loss) on futures contracts described in the Additional Investment Information sections of the Schedules of Investments. Only the variation margin as of December 31, 2021 is reported within the Statements of Assets and Liabilities.

4. INVESTMENTS IN DERIVATIVES (continued)

The following tables set forth, by certain risk types, the Funds' gains (losses) related to these derivatives and their indicative volumes for the year ended December 31, 2021. These gains (losses) should be considered in the context that these derivative contracts may have been executed to create investment opportunities and/or economically hedge certain investments, and accordingly, certain gains (losses) on such derivative contracts may offset certain (losses) gains attributable to investments. These gains (losses) are included in "Net realized gain (loss)" or "Net change in unrealized gain (loss)" on the Statements of Operations:

Equity Index

Risk	Statement of Operations	Net Realized Gain (Loss)	Net Change in Unrealized Gain (Loss)
Equity	Net realized gain (loss) from futures contracts/Net change in unrealized gain (loss) on futures contracts	\$410,607	\$(28,046)

International Equity Insights

Risk	Statement of Operations	Net Realized Gain (Loss)	Net Change in Unrealized Gain (Loss)
Equity	Net realized gain (loss) from futures contracts/Net change in unrealized gain (loss) on futures contracts	\$189,281	\$(22,567)

Small Cap Equity Insights

Risk	Statement of Operations	Net Realized Gain (Loss)	Net Change in Unrealized Gain (Loss)
Equity	Net realized gain (loss) from futures contracts/Net change in unrealized gain (loss) on futures contracts	\$192,178	\$(43,630)

For the year ended December 31, 2021, the relevant values for each derivative type were as follows:

Fund	Average Number of Contracts ⁽¹⁾
Equity Index	7
International Equity Insights	20
Small Cap Equity Insights	17

(1) Amounts disclosed represent average number of contracts for futures contracts, based on absolute values, which is indicative of volume of this derivative type, for the months that the Fund held such derivatives during the fiscal year ended December 31, 2021.

5. AGREEMENTS AND AFFILIATED TRANSACTIONS

A. Management Agreement — Under the Agreement, GSAM manages the Funds, subject to the general supervision of the Trustees.

As compensation for the services rendered pursuant to the Agreement, the assumption of the expenses related thereto and administration of the Funds' business affairs, including providing facilities, GSAM is entitled to a management fee, accrued daily and paid monthly, equal to an annual percentage rate of each Fund's average daily net assets.

Notes to Financial Statements (continued)

December 31, 2021

5. AGREEMENTS AND AFFILIATED TRANSACTIONS (continued)

For the year ended December 31, 2021, contractual and effective net management fees with GSAM were at the following rates:

Fund	Contractual Management Rate					Effective Rate	Effective Net Management Rate [^]
	First \$1 billion	Next \$1 billion	Next \$3 billion	Next \$3 billion	Over \$8 billion		
Growth Opportunities	0.87%	0.87%	0.78%	0.74%	0.73%	0.87%	0.82%*
International Equity Insights	0.81	0.73	0.69	0.68	0.67	0.81	0.81
Large Cap Value	0.72	0.65	0.62	0.60	0.59	0.72	0.68*
Mid Cap Value	0.77	0.77	0.69	0.66	0.65	0.77	0.77
Small Cap Equity Insights	0.70	0.70	0.63	0.60	0.59	0.70	0.70
Strategic Growth	0.71	0.64	0.61	0.59	0.58	0.71	0.71
U.S. Equity Insights	0.62	0.59	0.56	0.55	0.54	0.62	0.54*

[^] Effective Net Management Rate includes the impact of management fee waivers of affiliated Underlying Funds, if any. The Effective Net Management Rate may not correlate to the Contractual Management Rate as a result of management fee waivers that may be in effect from time to time.

* GSAM agreed to waive a portion of its management fee in order to achieve an effective net management rate as defined in the Funds' most recent prospectus. This waiver will remain in effect through at least April 30, 2022, and prior to such date GSAM may not terminate the arrangement without approval of the Trustees.

The Growth Opportunities, International Equity Insights, Large Cap Value, Mid Cap Value, Small Cap Equity Insights, Strategic Growth and U.S. Equity Insights Funds invest in Institutional Shares of the Goldman Sachs Financial Square Government Fund, which is an affiliated Underlying Fund. GSAM has agreed to waive a portion of its management fee payable by the Funds in an amount equal to the management fee it earns as an investment adviser to the affiliated Underlying Fund in which the Funds invest, except those management fees it earns from the Funds' investments of cash collateral received in connection with securities lending transactions in the Goldman Sachs Financial Square Government Fund. For the year ended December 31, 2021, with respect to the Funds' investments in an affiliated Underlying Fund GSAM waived \$479, \$3, \$1,469, \$2,221, \$849, \$2,084 and \$17 of the Growth Opportunities, International Equity Insights, Large Cap Value, Mid Cap Value, Small Cap Equity Insights, Strategic Growth and U.S. Equity Insights Funds' management fees, respectively.

The Agreement for the Equity Index Fund provides for a contractual management fee at an annual rate equal to 0.30% of the Fund's average daily net assets. The Investment Adviser has agreed to waive a portion of the management fee equal to 0.09% of the annual contractual rate applicable to the Equity Index Fund's average daily net assets between \$0 and \$400 million and 0.10% of the annual contractual rate applicable to the Fund's average daily net assets in excess of \$400 million. This management fee waiver will remain in effect through at least April 30, 2022, and prior to such date the Investment Adviser may not terminate the arrangement without the approval of the Board of Trustees. For the year ended December 31, 2021, the Fund paid GSAM an Effective Net Management Rate of 0.21%.

As authorized by the Agreement for the Equity Index Fund, GSAM has entered into a Sub-advisory Agreement with SSgA Funds Management, Inc. ("SSgA") which serves as the sub-adviser to the Fund and provides the day-to-day advice regarding the Fund's portfolio transactions. As compensation for its services, SSgA is entitled to a fee, accrued daily and paid monthly by GSAM, at the following annual rates of the Fund's average daily net assets: 0.03% on the first \$50 million, 0.02% on the next \$200 million, 0.01% on the next \$750 million and 0.008% over \$1 billion. The effective Sub-advisory fee was 0.02% for the year ended December 31, 2021.

B. Distribution and Service (12b-1) Plans — The Trust, on behalf of Service Shares of each Fund, has adopted a Distribution and Service Plan subject to Rule 12b-1 under the Act. Under the Distribution and Service Plan, Goldman Sachs, which serves as distributor (the "Distributor"), is entitled to a fee accrued daily and paid monthly for distribution services and personal and account maintenance services, which may then be paid by Goldman Sachs to authorized dealers, equal to, on an annual basis, 0.25% of the

5. AGREEMENTS AND AFFILIATED TRANSACTIONS (continued)

Funds' average daily net assets attributable to Service Shares. For the fiscal year ended December 31, 2021 for the U.S. Equity Insights Fund, Goldman Sachs agreed to waive distribution and services fees so as not to exceed an annual rate of 0.21% of average daily net assets of the Fund. For the period from April 30, 2021 to December 31, 2021 for the Growth Opportunities Fund, Goldman Sachs agreed to waive distribution and services fees so as not to exceed an annual rate of 0.15% of average daily net assets of the Fund. These distribution and service fee waivers will remain in place through at least April 30, 2022, and prior to such date Goldman Sachs may not terminate the arrangement without the approval of the Trustees. Prior to April 30, 2021, Goldman Sachs had agreed to waive distribution and service fees so as not to exceed an annual rate of 0.16% of average daily net assets of the Growth Opportunities Fund.

C. Transfer Agency Agreement — Goldman Sachs also serves as the transfer agent of the Funds for a fee pursuant to the Transfer Agency Agreement. The fees charged for such transfer agency services are accrued daily and paid monthly at an annual rate of 0.02% of the average daily net assets of Institutional and Service Shares. Goldman Sachs has agreed to waive its transfer agency fee attributable to the Service Shares of the Large Cap Value Fund. This arrangement will remain in place through at least April 30, 2022, and prior to such date Goldman Sachs may not terminate the arrangement without approval of the Board of Trustees.

D. Other Expense Agreements and Affiliated Transactions — GSAM has agreed to reduce or limit certain “Other Expenses” of the Funds (excluding acquired fund fees and expenses, transfer agency fees and expenses, service fees and shareholder administration fees (as applicable), taxes, interest, brokerage fees, expenses of shareholder meetings, litigation and indemnification, and extraordinary expenses) to the extent such expenses exceed, on an annual basis, a percentage rate of the average daily net assets of each Fund. Such Other Expense reimbursements, if any, are accrued daily and paid monthly. In addition, the Funds are not obligated to reimburse GSAM for prior fiscal year expense reimbursements, if any. The Other Expense limitations as an annual percentage rate of average daily net assets for the Equity Index, Growth Opportunities, International Equity Insights, Large Cap Value, Mid Cap Value, Small Cap Equity Insights, Strategic Growth and U.S. Equity Insights Funds are 0.004%, 0.004%, 0.044%, 0.004%, 0.054%, 0.094%, 0.014% and 0.004%, respectively. These Other Expense limitations will remain in place through at least April 30, 2022, and prior to such date GSAM may not terminate the arrangements without the approval of the Trustees. In addition, the Funds have entered into certain offset arrangements with the custodian and the transfer agent, which may result in a reduction of the Funds' expenses and are received irrespective of the application of the “Other Expense” limitations described above.

For the fiscal year ended December 31, 2021, these expense reductions, including any fee waivers and Other Expense reimbursements, were as follows:

Fund	Management Fee Waiver	Distribution and Service Fee Waiver	Transfer Agency Waiver/Credits	Other Expense Reimbursement	Total Expense Reductions
Equity Index	\$182,363	\$ —	\$ —	\$264,860	\$447,223
Growth Opportunities	43,361	76,788	—	235,253	355,402
International Equity Insights	3	—	—	310,433	310,436
Large Cap Value	193,178	—	46,366	291,066	530,610
Mid Cap Value	2,221	93,494	—	—	95,715
Small Cap Equity Insights	849	—	—	145,033	145,882
Strategic Growth	2,084	—	—	235,886	237,970
U.S. Equity Insights	283,883	5,882	—	273,878	563,643

Notes to Financial Statements (continued)

December 31, 2021

5. AGREEMENTS AND AFFILIATED TRANSACTIONS (continued)

G. Line of Credit Facility — As of December 31, 2021, the Funds participated in a \$1,000,000,000 committed, unsecured revolving line of credit facility (the “facility”) together with other funds of the Trust and certain registered investment companies having management agreements with GSAM or its affiliates. This facility is to be used for temporary emergency purposes, or to allow for an orderly liquidation of securities to meet redemption requests. The interest rate on borrowings is based on the federal funds rate. The facility also requires a fee to be paid by the Funds based on the amount of the commitment that has not been utilized. For the fiscal year ended December 31, 2021, the Fund did not have any borrowings under the facility. Prior to April 26, 2021, the facility was \$700,000,000.

H. Other Transactions with Affiliates — For the fiscal year ended December 31, 2021, Goldman Sachs earned \$64, \$39, \$436 and \$919 in brokerage commissions from portfolio transactions, including futures transactions executed with Goldman Sachs as the Futures Commission Merchant, on behalf of the Growth Opportunities, Large Cap Value, Mid Cap Value and Strategic Growth Funds, respectively.

The following table provides information about the investment in shares of issuers of which a Fund is an affiliate as of and for the fiscal year ended December 31, 2021:

Fund	Name of Affiliated Issuer	Beginning Value as of December 31, 2020	Purchases at Cost	Proceeds from Sales	Net Realized Gain (Loss)	Change in Unrealized Appreciation (Depreciation)	Ending Value as of December 31, 2021	Shares as of December 31, 2021	Dividend Income
Equity Index	Goldman Sachs Group, Inc. (The)	\$527,684	\$14,700	\$(63,853)	\$34,656	\$198,739	\$711,926	1,861	\$4,875

The following table provides information about the Funds’ investment in the Goldman Sachs Financial Square Government Fund as of and for the fiscal year ended December 31, 2021:

Fund	Beginning Value as of December 31, 2020	Purchases at Cost	Proceeds from Sales	Ending Value as of December 31, 2021	Shares as of December 31, 2021	Dividend Income
Growth Opportunities	\$ 739,866	\$ 20,063,016	\$ (19,869,192)	\$ 933,690	933,690	\$205
International Equity Insights	—	1,442,826	(1,442,826)	—	—	—
Large Cap Value	396,415	73,360,661	(71,005,612)	2,751,464	2,751,464	500
Mid Cap Value	1,803,152	105,437,489	(102,479,236)	4,761,405	4,761,405	781
Small Cap Equity Insights	1,017,248	22,009,119	(23,026,367)	—	—	350
Strategic Growth	3,315,576	69,153,518	(67,959,804)	4,509,290	4,509,290	721

As of December 31, 2021, The Goldman Sachs Group, Inc. was the beneficial owner of approximately 18% of the Institutional Shares of the Growth Opportunities Fund.

6. PORTFOLIO SECURITIES TRANSACTION

The cost of purchases and proceeds from sales and maturities of long-term securities for the fiscal year ended December 31, 2021, were as follows:

Fund	Purchases	Sales and Maturities
Equity Index	\$ 8,044,741	\$ 19,478,100
Growth Opportunities	39,698,813	54,080,568
International Equity Insights	168,615,872	167,995,322
Large Cap Value	255,424,116	327,340,597
Mid Cap Value	325,962,341	400,426,786
Small Cap Equity Insights	213,405,302	207,905,116
Strategic Growth	87,126,395	152,617,642
U.S. Equity Insights	719,749,524	749,657,479

7. SECURITIES LENDING

The Growth Opportunities, Large Cap Value, Mid Cap Value and Strategic Growth Funds may lend their securities through a securities lending agent, the Bank of New York Mellon (“BNYM”), to certain qualified borrowers. Pursuant to exemptive relief granted by the Securities and Exchange Commission (“SEC”) and the terms and conditions contained therein, the Equity Index, International Equity Insights, Small Cap Equity Insights and U. S. Equity Insights Funds may lend their securities through a securities lending agent, Goldman Sachs Agency Lending (“GSAL”), a wholly-owned subsidiary of Goldman Sachs, to certain qualified borrowers including Goldman Sachs and affiliates. In accordance with the Funds’ securities lending procedures, the Funds receive cash collateral at least equal to the market value of the securities on loan. The market value of the loaned securities is determined at the close of business of the Funds, at their last sale price or official closing price on the principal exchange or system on which they are traded, and any additional required collateral is delivered to the Funds on the next business day. As with other extensions of credit, the Funds may experience delay in the recovery of their securities or incur a loss should the borrower of the securities breach its agreement with the Funds or become insolvent at a time when the collateral is insufficient to cover the cost of repurchasing securities on loan. Dividend income received from securities on loan may not be subject to withholding taxes and therefore withholding taxes paid may differ from the amounts listed in the Statements of Operations. Loans of securities are terminable at any time and as such 1) the remaining contractual maturities of the outstanding securities lending transactions are considered to be overnight and continuous and 2) the borrower, after notice, is required to return borrowed securities within the standard time period for settlement of securities transactions.

The Equity Index, Growth Opportunities, International Equity Insights, Large Cap Value, Mid Cap Value, Small Cap Equity Insights, Strategic Growth and U.S. Equity Insights Funds invest the cash collateral received in connection with securities lending transactions in the Goldman Sachs Financial Square Government Fund (“Government Money Market Fund”), an affiliated series of the Goldman Sachs Trust. The Government Money Market Fund is registered under the Act as an open end investment company, is subject to Rule 2a-7 under the Act, and is managed by GSAM, for which GSAM may receive a management fee of up to 0.16% on an annualized basis of the average daily net assets of the Government Money Market Fund.

In the event of a default by a borrower with respect to any loan, GSAL will, and BNYM may, exercise any and all remedies provided under the applicable borrower agreement to make the Funds whole. These remedies include purchasing replacement securities by applying the collateral held from the defaulting broker against the purchase cost of the replacement securities. If GSAL or BNYM are unable to purchase replacement securities, GSAL and/or BNYM will indemnify the Funds by paying the

7. SECURITIES LENDING (continued)

Funds an amount equal to the market value of the securities loaned minus the value of cash collateral received from the borrower for the loan, subject to an exclusion for any shortfalls resulting from a loss of value in such cash collateral due to reinvestment risk. The Funds' master netting agreements with certain borrowers provide the right, in the event of a default (including bankruptcy or insolvency), for the non-defaulting party to liquidate the collateral and calculate net exposure to the defaulting party or request additional collateral. However, in the event of a default by a borrower, a resolution authority could determine that such rights are not enforceable due to the restrictions or prohibitions against the right of set-off that may be imposed in accordance with a particular jurisdiction's bankruptcy or insolvency laws. The Funds' loaned securities were all subject to enforceable Securities Lending Agreements and the value of the collateral was at least equal to the value of the cash received. The amounts of the Funds' overnight and continuous agreements, which represent the gross amounts of recognized liabilities for securities lending transactions outstanding as of December 31, 2021, are disclosed as "Payable upon return of securities loaned" on the Statements of Assets and Liabilities, where applicable. The Large Cap Value and Mid Cap Value Funds did not have securities on loan as of December 31, 2021.

Each of the Funds, GSAL and BNYM received compensation relating to the lending of the Funds' securities. The amounts earned, if any, by the Funds' for the fiscal year ended December 31, 2021, are reported under Investment Income on the Statements of Operations.

The table below details securities lending activity with affiliates of Goldman Sachs:

Fund	For the fiscal year ended December 31, 2021		Amounts payable to Goldman Sachs Upon Return of Securities Loaned as of December 31, 2021
	Earnings of GSAL Relating to Securities Loaned	Amounts Received by the Funds from Lending to Goldman Sachs

Unrealized gains — net	149,915,404	12,710,748	265,163,783	97,122,642
Total accumulated earnings (losses) — net	\$171,982,846	\$13,724,139	\$273,021,502	\$98,945,946

As of December 31, 2021, the Funds' aggregate security unrealized gains and losses based on cost for U.S. federal income tax purposes were as follows:

	Equity Index	Growth Opportunities	International Equity Insights	Large Cap Value
Tax cost	\$ 55,735,384	\$54,273,300	\$97,139,188	\$366,646,704
Gross unrealized gain	166,434,896	26,387,114	12,520,893	128,821,719
Gross unrealized loss	(1,616,646)	(2,491,038)	(4,122,643)	(7,379,692)
Net unrealized gain (loss)	\$164,818,250	\$23,896,076	\$ 8,398,250	\$121,442,027

	Mid Cap Value	Small Cap Equity Insights	Strategic Growth	U.S. Equity Insights
Tax cost	\$402,821,740	\$118,081,516	\$185,025,529	\$281,094,071
Gross unrealized gain	156,969,714	19,687,022	274,698,581	102,936,521
Gross unrealized loss	(7,054,310)	(6,976,274)	(9,534,798)	(5,813,879)
Net unrealized gain (loss)	\$149,915,404	\$ 12,710,748	\$265,163,783	\$ 97,122,642

The difference between GAAP-basis and tax-basis unrealized gains (losses) is attributable primarily to wash sales, net mark to market gains (losses) on regulated futures and foreign currency contracts, and differences in the tax treatment of real estate investment trust investments and passive foreign investment company investments.

GSAM has reviewed the Funds' tax positions for all open tax years (the current and prior three years, as applicable) and has concluded that no provision for income tax is required in the Funds' financial statements. Such open tax years remain subject to examination and adjustment by tax authorities.

9. OTHER RISKS

The Funds' risks include, but are not limited to, the following:

Derivatives Risk — A Fund's use of derivatives may result in loss. Derivative instruments, which may pose risks in addition to and greater than those associated with investing directly in securities, currencies or other instruments, may be illiquid or less liquid, volatile, difficult to price and leveraged so that small changes in the value of the underlying instruments may produce disproportionate losses to the Funds. Derivatives are also subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligation. The use of derivatives is a highly specialized activity that involves investment

9. OTHER RISKS (continued)

techniques and risks different from those associated with investments in more traditional securities and instruments. Losses from derivatives can also result from a lack of correlation between changes in the value of derivative instruments and the portfolio assets (if any) being hedged.

Foreign and Emerging Countries Risk — Investing in foreign markets may involve special risks and considerations not typically associated with investing in the U.S. Foreign securities may be subject to risk of loss because of more or less foreign government regulation, less public information and less economic, political and social stability in the countries in which a Fund invests. The imposition of exchange controls (including repatriation restrictions), confiscation of assets and property, trade restrictions (including tariffs) and other government restrictions by the U.S. or other governments, or problems with registration, settlement or custody, may also result in losses. Foreign risk also involves the risk of negative foreign currency rate fluctuations, which may cause the value of securities denominated in such foreign currency (or other instruments through which a Fund has exposure to foreign currencies) to decline in value. Currency exchange rates may fluctuate significantly over short periods of time. To the extent that a Fund also invests in securities of issuers located in emerging markets, these risks may be more pronounced.

Foreign Custody Risk — A Fund invests in foreign securities, and as such the Fund may hold such securities and cash with foreign banks, agents, and securities depositories appointed by the Fund's custodian (each a "Foreign Custodian"). Some foreign custodians may be recently organized or new to the foreign custody business. In some countries, Foreign Custodians may be subject to little or no regulatory oversight over, or independent evaluation of, their operations. Further, the laws of certain countries may place limitations on a Fund's ability to recover its assets if a Foreign Custodian enters bankruptcy. Investments in emerging markets may be subject to even greater custody risks than investments in more developed markets. Custody services in emerging market countries are very often undeveloped and may be considerably less well regulated than in more developed countries, and thus may not afford the same level of investor protection as would apply in developed countries.

Investments in Other Investment Companies Risk — As a shareholder of another investment company, a Fund will indirectly bear its proportionate share of any net management fees and other expenses paid by such other investment companies, in addition to the fees and expenses regularly borne by the Fund.

Large Shareholder Transactions Risk — A Fund may experience adverse effects when certain large shareholders, such as other funds, participating insurance companies, accounts and Goldman Sachs affiliates, purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions, which may occur rapidly or unexpectedly, may cause a Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact a Fund's NAV and liquidity. These transactions may also accelerate the realization of taxable income to shareholders if such sales of investments resulted in gains, and may also increase transaction costs. In addition, a large redemption could result in a Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio. Similarly, large Fund share purchases may adversely affect a Fund's performance to the extent that the Fund is delayed in investing new cash or otherwise maintains a larger cash position than it ordinarily would.

Liquidity Risk — A Fund may make investments that are illiquid or that may become less liquid in response to market developments or adverse investor perceptions. Illiquid investments may be more difficult to value. Liquidity risk may also refer to the risk that a Fund will not be able to pay redemption proceeds within the allowable time period or without significant dilution to remaining investors' interests because of unusual market conditions, an unusually high volume of redemption requests, or other reasons. To meet redemption requests, a Fund may be forced to sell investments at an unfavorable time and/or under unfavorable conditions. If a Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions, such sales may adversely affect the Fund's NAV and dilute remaining investors' interests. These risks may be more pronounced in connection with a Fund's investments in securities of issuers located in emerging market countries. Redemptions by large shareholders may have a negative impact on a Fund's liquidity.

Market and Credit Risks — In the normal course of business, a Fund trades financial instruments and enters into financial transactions where risk of potential loss exists due to changes in the market (market risk). The value of the securities in which a

Notes to Financial Statements (continued)

December 31, 2021

9. OTHER RISKS (continued)

Fund invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, acts of terrorism, social unrest, natural disasters, the spread of infectious illness or other public health threats could also significantly impact a Fund and its investments. Additionally, a Fund may also be exposed to credit risk in the event that an issuer or guarantor fails to perform or that an institution or entity with which the Fund has unsettled or open transactions defaults.

Non-Diversification Risk — The Strategic Growth Fund is non-diversified, meaning that it is permitted to invest a larger percentage of its assets in one or more issuers or in fewer issuers than diversified mutual funds. Thus, the Fund may be more susceptible to adverse developments affecting any single issuer held in its portfolio, and may be more susceptible to greater losses because of these developments.

10. INDEMNIFICATIONS

Under the Trust's organizational documents, its Trustees, officers, employees and agents are indemnified, to the extent permitted by the Act and state law, against certain liabilities that may arise out of performance of their duties to the Funds. Additionally, in the course of business, the Funds enter into contracts that contain a variety of indemnification clauses. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, GSAM believes the risk of loss under these arrangements to be remote.

11. SUBSEQUENT EVENTS

Upon the recommendation of GSAM, the Board of Trustees of the Goldman Sachs Variable Insurance Trust recently approved changes to the Goldman Sachs Growth Opportunities Fund's name and principal investment strategy. The Fund's name will change to the "Goldman Sachs Mid Cap Growth Fund." These changes are not expected to materially affect the Fund's current portfolio holdings. These changes will become effective after the close of business on April 29, 2022.

Subsequent events after the Statements of Assets and Liabilities date, other than the above, have been evaluated, and GSAM has concluded that there is no impact requiring adjustment or disclosure in the financial statements.

Report of Independent Registered Public Accounting Firm

To the Board of Trustees of Goldman Sachs Variable Insurance Trust and Shareholders of Goldman Sachs Equity Index Fund, Goldman Sachs Growth Opportunities Fund, Goldman Sachs International Equity Insights Fund, Goldman Sachs Large Cap Value Fund, Goldman Sachs Mid Cap Value Fund, Goldman Sachs Small Cap Equity Insights Fund, Goldman Sachs Strategic Growth Fund, and Goldman Sachs U.S. Equity Insights Fund

Opinions on the Financial Statements

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of Goldman Sachs Equity Index Fund, Goldman Sachs Growth Opportunities Fund, Goldman Sachs International Equity Insights Fund, Goldman Sachs Large Cap Value Fund, Goldman Sachs Mid Cap Value Fund, Goldman Sachs Small Cap Equity Insights Fund, Goldman Sachs Strategic Growth Fund, and Goldman Sachs U.S. Equity Insights Fund (eight of the Funds constituting Goldman Sachs Variable Insurance Trust, referred to hereafter as the “Funds”) as of December 31, 2021, the related statements of operations for the year ended December 31, 2021, the statements of changes in net assets for each of the two years in the period ended December 31, 2021, including the related notes, and the financial highlights for each of the five years in the period ended December 31, 2021 (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of December 31, 2021, the results of each of their operations for the year then ended, the changes in their net assets for each of the two years in the period ended December 31, 2021 and each of the financial highlights for each of the five years in the period ended December 31, 2021 in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinions

These financial statements are the responsibility of the Funds’ management. Our responsibility is to express an opinion on the Funds’ financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2021 by correspondence with the custodian, transfer agent and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

/s/ PricewaterhouseCoopers LLP

Boston, Massachusetts
February 23, 2022

We have served as the auditor of one or more investment companies in the Goldman Sachs fund complex since 2000.

Voting Results of Special Meeting of Shareholders (Unaudited)

A Special Meeting of the Goldman Sachs Variable Insurance Trust was held on January 8, 2021 to consider and act upon a proposal to approve a change to the Goldman Sachs Strategic Growth Fund's sub-classification under the Investment Company Act of 1940 from "diversified" to "non-diversified" and eliminate the Fund's related fundamental investment restriction.

The shareholders voted as follows:

Proposal 1	For	Against/Withhold	Abstain
To approve a change to each respective Fund's sub-classification under the Investment Company Act of 1940 from "diversified" to "non-diversified" and to eliminate any related fundamental investment restriction for the Fund.	21,360,462.737	1,890,396.988	2,070,989.714

Fund Expenses — Six Month Period Ended December 31, 2021 (Unaudited)

As a shareholder of Institutional or Service Shares of the Funds, you incur ongoing costs, including management fees, distribution and/or service (12b-1) fees (with respect to Service Shares) and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Institutional Shares and Service Shares of the Funds and to compare these costs with the ongoing costs of investing in other mutual funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from July 1, 2021 through December 31, 2021, which represents a period of 184 days of a 365 day year.

Actual Expenses — The first line under each share class in the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000=8.6), then multiply the result by the number in the first line under the heading entitled “Expenses Paid” to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes — The second line under each share class in the table below provides information about hypothetical account values and hypothetical expenses based on the Funds’ actual net expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Funds’ actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Funds and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only. As a shareholder of the Funds you do not incur any transaction costs, such as sales charges, redemption fees, or exchange fees, but shareholders of other funds may incur such costs. The second line of the table is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds whose shareholders may incur transaction costs.

Share Class	Equity Index Fund			Growth Opportunities Fund			International Equity Insights Fund			Large Cap Value Fund		
	Beginning Account Value 7/1/21	Ending Account Value 12/31/21	Expenses Paid for the 6 months ended 12/31/2021*	Beginning Account Value 7/1/21	Ending Account Value 12/31/21	Expenses Paid for the 6 months ended 12/31/2021*	Beginning Account Value 7/1/21	Ending Account Value 12/31/21	Expenses Paid for the 6 months ended 12/31/2021*	Beginning Account Value 7/1/21	Ending Account Value 12/31/21	Expenses Paid for the 6 months ended 12/31/2021*

Actual	N/A	N/A	N/A	\$1,000.00	\$1,050.87	\$4.60	\$1,000.00	\$1,011.41	\$4.41	\$1,000.00	\$1,086.60	\$3.68
Hypothetical 5% return	N/A	N/A	N/A	1,000.00	1,020.72+	4.53	1,000.00	1,020.82+	4.43	1,000.00	1,021.68+	3.57
Service												
Actual	1,000.00	\$1,114.32	\$2.56	1,000.00	1,051.04	5.38	1,000.00	1,010.72	5.68	1,000.00	1,085.84	4.94
Hypothetical 5% return	1,000.00	1,022.79+	2.45	1,000.00	1,019.96+	5.30	1,000.00	1,019.56+	5.70	1,000.00	1,020.47+	4.79

+ Hypothetical expenses are based on each Fund’s actual annualized net expense ratios and an assumed rate of return of 5% per year before expenses.

* Expenses are calculated using each Fund’s annualized net expense ratio for each class, which represents the ongoing expenses as a percentage of net assets for the six months ended December 31, 2021. Expenses are calculated by multiplying the annualized net expense ratio by the average account value for the period; then multiplying the result by the number of days in the most recent fiscal half year; and then dividing that result by the number of days in the fiscal year. The annualized net expense ratios for the period were as follows:

Fund	Institutional Shares	Service Shares
Equity Index Fund	N/A	0.48%
Growth Opportunities Fund	0.89%	1.04
International Equity Insights Fund	0.87	1.12
Large Cap Value Fund	0.70	0.94

Fund Expenses — Six Month Period Ended December 31, 2021 (Unaudited) (continued)

As a shareholder of Institutional or Service Shares of the Funds, you incur ongoing costs, including management fees, distribution and/or service (12b-1) fees (with respect to Service and Advisor Shares) and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Institutional Shares and Service Shares of the Funds and to compare these costs with the ongoing costs of investing in other mutual funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from July 1, 2021 through December 31, 2021, which represents a period of 184 days of a 365 day year.

Interested Trustee*

Name, Address and Age ¹	Position(s) Held with the Trust	Term of Office and Length of Time Served ²	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Trustee ³	Other Directorships Held by Trustee ⁴
James A. McNamara Age: 59	President and Trustee	Since 2007	Advisory Director, Goldman Sachs (January 2018-Present); Managing Director, Goldman Sachs (January 2000-December 2017); Director of Institutional Fund Sales, GSAM (April 1998-December 2000); and Senior Vice President and Manager, Dreyfus Institutional Service Corporation (January 1993-April 1998). President and Trustee — Goldman Sachs Trust; Goldman Sachs Variable Insurance Trust; Goldman Sachs Trust II; Goldman Sachs ETF Trust; Goldman Sachs ETF Trust II; Goldman Sachs MLP and Energy Renaissance Fund; Goldman Sachs Credit Income Fund; and Goldman Sachs Real Estate Diversified Income Fund.	170	None

* Mr. McNamara is considered to be an "Interested Trustee" because he holds positions with Goldman Sachs and owns securities issued by The Goldman Sachs Group, Inc. Mr. McNamara holds comparable positions with certain other companies of which Goldman Sachs, GSAM or an affiliate thereof is the investment adviser, administrator and/or distributor.

¹ Each Trustee may be contacted by writing to the Trustee, c/o Goldman Sachs, 200 West Street, New York, New York, 10282, Attn: Caroline Kraus. Information is provided as of December 31, 2021.

² Subject to such policies as may be adopted by the Board from time-to-time, each Trustee holds office for an indefinite term, until the earliest of: (a) the election of his or her successor; (b) the date the Trustee resigns or is removed by the Board or shareholders, in accordance with the Trust's Declaration of Trust; or (c) the termination of the Trust. The Board has adopted policies which provide that each Independent Trustee shall retire as of December 31st of the calendar year in which he or she reaches (a) his or her 75th birthday or (b) the 15th anniversary of the date he or she became a Trustee, whichever is earlier, unless a waiver of such requirements shall have been adopted by a majority of the other Trustees. These policies may be changed by the Trustees without shareholder vote.

³ The Goldman Sachs Fund Complex includes certain other companies listed above for each respective Trustee. As of December 31, 2021, Goldman Sachs Trust consisted of 92 portfolios (90 of which offered shares to the public); Goldman Sachs Variable Insurance Trust consisted of 17 portfolios (13 of which offered shares to the public); Goldman Sachs Trust II consisted of 18 portfolios (16 of which offered shares to the public); Goldman Sachs ETF Trust consisted of 39 portfolios (26 of which offered shares to the public); and Goldman Sachs ETF Trust II, Goldman Sachs MLP and Energy Renaissance Fund, Goldman Sachs Credit Income Fund and Goldman Sachs Real Estate Diversified Income Fund each consisted of one portfolio. Goldman Sachs ETF Trust II and Goldman Sachs Credit Income Fund did not offer shares to the public.

⁴ This column includes only directorships of companies required to report to the Securities and Exchange Commission under the Securities Exchange Act of 1934 (i.e., "public companies") or other investment companies registered under the Act.

Additional information about the Trustees is available in the Funds' Statement of Additional Information, which can be obtained from Goldman Sachs free of charge by calling this toll-free number (in the United States of America): 1-800-526-7384.

The reports concerning the Fund included in this shareholder report may contain certain forward-looking statements about the factors that may affect the performance of the Fund in the future. These statements are based on Fund management's predictions and expectations concerning certain future events and their expected impact on the Fund, such as performance of the economy as a whole and of specific industry sectors, changes in the levels of interest rates, the impact of developing world events, and other factors that may influence the future performance of the Fund. Management believes these forward-looking statements to be reasonable, although they are inherently uncertain and difficult to predict. Actual events may cause adjustments in portfolio management strategies from those currently expected to be employed.

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities and information regarding how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available (i) without charge, upon request by calling 1-800-621-2550; and (ii) on the Securities and Exchange Commission ("SEC") web site at <http://www.sec.gov>.

The Fund will file its portfolio holdings information for each month in a fiscal quarter within 60 days after the end of the relevant fiscal quarter on Form N-PORT. Portfolio holdings information for the third month of each fiscal quarter will be made available on the SEC's web site at <http://www.sec.gov>. Portfolio holdings information may be obtained upon request and without charge by calling 1-800-526-7384 (for Retail Shareholders) or 1-800-621-2550 (for Institutional Shareholders).

Views and opinions expressed are for informational purposes only and do not constitute a recommendation by GSAM to buy, sell, or hold any security. Views and opinions are current as of the date of this presentation and may be subject to change, they should not be construed as investment advice.

Goldman Sachs & Co. LLC ("Goldman Sachs") does not provide legal, tax or accounting advice. Any statement contained in this communication (including any attachments) concerning U.S. tax matters was not intended or written to be used, and cannot be used, for the purpose of avoiding penalties under the Internal Revenue Code, and was written to support the promotion or marketing of transaction or matter addressed. Clients of Goldman Sachs should obtain their own independent tax advice based on their particular circumstances.

The website links provided are for your convenience only and are not an endorsement or recommendation by GSAM of any of these websites or the products or services offered. GSAM is not responsible for the accuracy and validity of the content of these websites.

Economic and market forecasts presented herein reflect our judgment as of the date of this presentation and are subject to change without notice. These forecasts do not take into account the specific investment objectives, restrictions, tax and financial situation or other needs of any specific client. Actual data will vary and may not be reflected here. These forecasts are subject to high levels of uncertainty that may affect actual performance. Accordingly, these forecasts should be viewed as merely representative of a broad range of possible outcomes. These forecasts are estimated, based on assumptions, and are subject to significant revision and may change materially as economic and market conditions change. Goldman Sachs has no obligation to provide updates or changes to these forecasts. Case studies and examples are for illustrative purposes only.

Fund holdings and allocations shown are as of December 31, 2021 and may not be representative of future investments. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk.

References to indices, benchmarks or other measures of relative market performance over a specified period of time are provided for your information only and do not imply that the portfolio will achieve similar results. The index composition may not reflect the manner in which a portfolio is constructed. While an adviser seeks to design a portfolio which reflects appropriate risk and return features, portfolio characteristics may deviate from those of the benchmark.

The Global Industry Classification Standard ("GICS") was developed by and is the exclusive property and a service mark of Morgan Stanley Capital International Inc. ("MSCI") and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. ("S&P") and is licensed for use by Goldman Sachs. Neither MSCI, S&P nor any other party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

The portfolio risk management process includes an effort to monitor and manage risk, but does not imply low risk.

Shares of the Goldman Sachs VIT Funds are offered to separate accounts of participating life insurance companies for the purpose of funding variable annuity contracts and variable life insurance policies. Shares of the Fund are not offered directly to the general public. The variable annuity contracts and variable life insurance policies are described in the separate prospectuses issued by participating insurance companies. You should refer to those prospectuses for information about surrender charges, mortality and expense risk fees and other charges that may be assessed by participating insurance companies under the variable annuity contracts or variable life insurance policies. Such fees or charges, if any, may affect the return you may realize with respect to your investments. Ask your representative for more complete information. Please consider a fund's objectives, risks and charges and expenses, and read the prospectus carefully before investing. The prospectus contains this and other information about the Fund.

This material is not authorized for distribution to prospective investors unless preceded or accompanied by a current prospectus or summary prospectus, if applicable. Investors should consider the Fund's objective, risks, and charges and expenses, and read the summary prospectus, if available, and/or the prospectus carefully before investing or sending money. The summary prospectus, if available, and the prospectus contain this and other information about the Fund and may be obtained from your authorized dealer or from Goldman Sachs & Co. LLC by calling 1-800-621-2550

This report is prepared for the general information of contract owners and is not an offer of shares of the Goldman Sachs Variable Insurance Trust Funds.
